Compiled by DataHaven in August 2023.

This report is designed to inform local-level efforts to improve community well-being and racial equity. This is version 2.0 of the DataHaven town equity profile, which DataHaven has published for all 169 towns and several regions of Connecticut. Please contact DataHaven with suggestions for version 3.0 of this report.

[ctdatahaven.org](http://ctdatahaven.org)

## EXECUTIVE SUMMARY

Throughout most of the measures in this report, there are important differences by race/ethnicity and neighborhood that reflect differences in access to resources and other social needs. Wherever possible, data are presented with racial/ethnic breakdowns, as defined by existing federal data collection standards. However, for smaller groups or more detailed breakdowns, some values may not be available or have less reliable data. In these cases, values are marked as “N/A,” not available.

Federal and statewide approaches to data collection, including small sample sizes, tend to hide disparities within certain population groups. This does not mean that a given population is not impacted by inequitable social conditions. DataHaven and other organizations often collect information on demographic characteristics besides race/ethnicity, and encourage further analysis and advocacy that can lead to more inclusive data reporting. Please contact DataHaven at [info@ctdatahaven.org](mailto:info@ctdatahaven.org) with questions about additional reporting that may be possible.

- Deep River is a town of **4,415 residents, 11 percent** of whom are people of color. The town’s population has decreased by **5 percent** since 2010.
- Of the town’s **2,061 households, 66 percent** are homeowner households.
- **Twenty-seven percent** of Deep River’s households are cost-burdened, meaning they spend at least 30 percent of their total income on housing costs.
- **Ninety-two percent** of public high school seniors in the class of 2021 in the Regional School District 04 graduated within four years.
- Among the town’s adults ages 25 and up, **44 percent** have earned a bachelor’s degree or higher.
- Deep River is home to **1,247 jobs**, with the largest share in the Manufacturing sector.
- The median household income in Deep River is **\$79,090**.
- As of 2015, Deep River’s average life expectancy was **77.9 years**.
- **Sixty-two percent** of adults in Middlesex County say they are in excellent or very good health.
- In 2021, **fewer than 5 people** in Deep River died of drug overdoses.
- **Eighty-seven percent** of adults in Middlesex County are satisfied with their area, and **58 percent** say their local government is responsive to residents’ needs.
- In the most recent state election, **86 percent** of registered voters in Deep River voted.
- **Forty-seven percent** of adults in Middlesex County report having stores, banks, and other locations in walking distance of their home, and **50 percent** say there are safe sidewalks and crosswalks in their neighborhood.

# OVERVIEW

For the purposes of this report, Deep River will be compared to Connecticut as a whole, as well as to the towns in Middlesex County.

**FIGURE 1: STUDY AREA**

**Middlesex County** is made up of the following towns (with 2020 populations):

- Chester (3,749)
- Clinton (13,185)
- Cromwell (14,225)
- Deep River (4,415)
- Durham (7,152)
- East Haddam (8,875)
- East Hampton (12,717)
- Essex (6,733)
- Haddam (8,452)
- Killingworth (6,174)
- Middlefield (4,217)
- Middletown (47,717)
- Old Saybrook (10,481)
- Portland (9,384)
- Westbrook (6,769)

**TABLE 1: ABOUT THE AREA**

Indicator	Connecticut	Middlesex County	Deep River
Total population	3,605,944	164,245	4,415
Total households	1,397,324	68,200	2,061
Homeownership rate	66%	74%	66%
Housing cost burden rate	35%	31%	27%
Adults with less than a high school diploma	9%	5%	5%
Median household income	\$83,572	\$90,833	\$79,090
Poverty rate	10%	6%	5%
Adults 18–64 w/o health insurance	10%	8%	7%
Life expectancy (years, 2015)	80.3	81.0	77.9

# DEMOGRAPHICS

As of 2020, the population of Deep River is 4,415, including 735 children and 3,680 adults. Eleven percent of Deep River’s residents are people of color, compared to 37 percent of residents statewide.

**TABLE 2: POPULATION BY RACE/ETHNICITY, 2020**

Area	White		Black		Latino		Asian		Other race/ethnicity	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	2,279,232	63%	360,937	10%	623,293	17%	170,459	5%	172,023	5%
Middlesex County	131,954	80%	8,001	5%	11,928	7%	4,923	3%	7,439	5%
Deep River	3,909	89%	<50	N/A	196	4%	<50	N/A	219	5%

As Connecticut’s predominantly white Baby Boomers age, younger generations are driving the state’s increased racial and ethnic diversity. Black and Latino populations in particular skew much younger than white populations.

**FIGURE 2: POPULATION BY RACE/ETHNICITY AND AGE GROUP, 2021**

Note: Only groups with at least 50 residents in each age group shown.

About 467 residents of Deep River, or 10 percent of the population, are foreign-born. The largest number of immigrants living in Middlesex County were born in Poland, followed by China and Italy.

**FIGURE 3: LINGUISTIC ISOLATION BY RACE/ETHNICITY, 2021**

## POPULATION CHANGE: 2020 CENSUS

The first set of data from the 2020 Census was released in August 2021, containing basic population counts by age and race/ethnicity. Between 2010 and 2020, Connecticut’s population was nearly stagnant. During the same period, Deep River shrank by 214 people, a 4.6 percent decrease. The number of white residents in Deep River shrank by 6.1 percent, while the non-white population grew by 8.8 percent.

**TABLE 3: POPULATION AND POPULATION CHANGE BY AGE GROUP, 2010–2020**

Area	Age	Population, 2010	Population, 2020	Change	Percent change
Connecticut	All ages	3,574,097	3,605,944	+31,847	+0.9%
	Children (0–17)	817,015	736,717	–80,298	–9.8%
	Adults (18+)	2,757,082	2,869,227	+112,145	+4.1%
Middlesex County	All ages	165,676	164,245	–1,431	–0.9%
	Children (0–17)	35,098	28,262	–6,836	–19.5%
	Adults (18+)	130,578	135,983	+5,405	+4.1%
Deep River	All ages	4,629	4,415	–214	–4.6%
	Children (0–17)	975	735	–240	–24.6%
	Adults (18+)	3,654	3,680	+26	+0.7%

**FIGURE 4: SHARE OF POPULATION BY RACE/ETHNICITY, 2010–2020**

# HOUSING

Deep River has 2,061 households, of which 66 percent are homeowner households. Of Deep River’s 2,261 housing units, both occupied and vacant, 70 percent are in single-family buildings and 29 percent are in multifamily buildings, compared to Middlesex County, where 75 percent are single-family and 24 percent are multifamily.

Homeownership rates vary by race/ethnicity. Purchasing a home is more attainable for advantaged groups because the process of purchasing a home has a long history of racially discriminatory practices that continue to restrict access to homeownership today. This challenge, coupled with municipal zoning dominated by single-family housing, results in de facto racial and economic segregation seen throughout Connecticut.

**TABLE 4: HOMEOWNERSHIP RATE BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2021**

Area	Total	White	Black	Latino	Asian
Connecticut	66%	76%	41%	37%	60%
Middlesex County	74%	79%	39%	47%	53%
Deep River	66%	71%	N/A	N/A	N/A

Younger adults are less likely than older adults to own their homes across several race/ethnicity groups. However, in most towns, younger white adults own their homes at rates comparable to or higher than older Black and Latino adults.

**FIGURE 5: HOMEOWNERSHIP RATES BY AGE AND RACE/ETHNICITY OF HEAD OF HOUSEHOLD, MIDDLESEX COUNTY, 2021**

A household is cost-burdened when they spend 30 percent or more of their income on housing costs, and severely cost-burdened when they spend half or more of their income on housing costs. Housing costs continue to rise, due in part to municipal zoning measures that limit new construction to very few towns statewide. Cost-burden generally affects renters more than homeowners, and has greater impact on Black and Latino householders. Among renter households in Deep River, 46 percent are cost-burdened, compared to 16 percent of owner households.

**FIGURE 6: HOUSING COST-BURDEN RATES BY RACE/ETHNICITY, 2021**

Household overcrowding is defined as having more than one occupant per room. Overcrowding may increase the spread of illnesses among the household and can be associated with higher levels of stress. Increasing the availability of appropriately-sized affordable units helps to alleviate overcrowding.

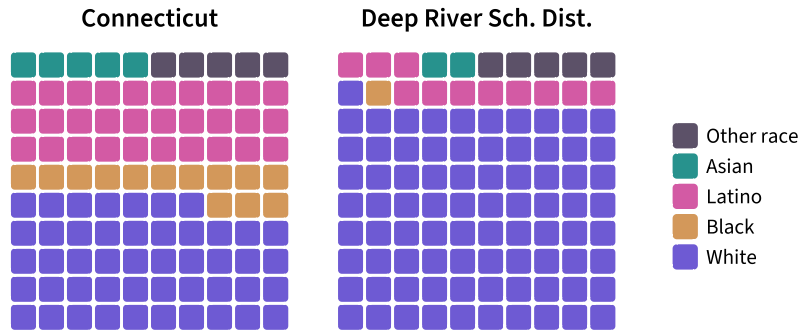

**TABLE 5: OVERCROWDED HOUSEHOLDS BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2021**

Area	Total		White		Black		Latino		Asian	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	27,078	2%	7,418	1%	4,868	3%	10,971	6%	3,445	6%
Middlesex County	532	1%	490	1%	<50	N/A	<50	N/A	<50	N/A
Deep River	<50	N/A	<50	N/A	<50	N/A	<50	N/A	<50	N/A

# EDUCATION

Public school students in Deep River are served by the Deep River School District for kindergarten through grade 6 and Regional School District 04 for grade 7 through grade 12. During the 2022-23 school year, there were 192 students enrolled in the Deep River School District and 751 students enrolled in Regional School District 04. Tracking student success measures is important since disparate academic and disciplinary outcomes are observed as early as preschool and can ultimately affect a person's long-term educational attainment and economic potential.

**FIGURE 7: PUBLIC K-12 STUDENT ENROLLMENT BY RACE/ETHNICITY PER 100 STUDENTS, 2022-23**

Note: Counts of small groups are suppressed by the Dept. of Education and may be missing from this chart.

**FIGURE 8: SELECTED ACADEMIC AND DISCIPLINARY OUTCOMES BY STUDENT RACE/ETHNICITY, 2020-21 AND 2021-22 SCHOOL YEARS**

\*: Deep River School District; †: Regional School District 04

Adults with high school diplomas or college degrees have more employment options and considerably higher potential earnings, on average, than those who do not finish high school. In Deep River, 5 percent of adults ages 25 and over, or 153 people, lack a high school diploma; statewide, this value is 9 percent.

**FIGURE 9: EDUCATIONAL ATTAINMENT BY RACE/ETHNICITY, SHARE OF ADULTS AGES 25 AND UP, 2021**

# ECONOMY

At the end of 2021, there were 1,247 total jobs in Deep River, with the largest share in the Manufacturing sector. While many industries saw major job losses early on in the COVID-19 pandemic, by early 2023 the number of jobs statewide had nearly caught back up to pre-pandemic counts.

**TABLE 6: JOBS AND WAGES IN DEEP RIVER’S 5 LARGEST SECTORS, 2021**

Sector	Connecticut		Middlesex County	
	Total jobs	Avg annual pay	Total jobs	Avg annual pay
All Sectors	1,591,760	\$77,816	66,346	\$62,531
Health Care and Social Assistance	267,984	\$60,835	11,554	\$58,236
Manufacturing	152,860	\$89,604	8,507	\$84,774
Retail Trade	167,286	\$41,652	7,329	\$38,292
Accommodation and Food Services	111,160	\$26,767	5,474	\$26,194
Construction	59,323	\$77,099	3,359	\$76,410

Nationwide, the onset of the pandemic led to a huge spike in unemployment rates, mirrored across Connecticut. At its peak in July 2020, Connecticut’s unemployment rate was 12.0 percent. As of December 2022, unemployment rates statewide and in Deep River were 3.2 percent and 2.2 percent, respectively.

**FIGURE 10: MONTHLY UNEMPLOYMENT RATE, 2013–2022, 3-MONTH ROLLING AVERAGE**

Individual earnings vary by race/ethnicity, sex, and other characteristics. These can be measured comparing the differences in average earnings between groups. White workers and men often out-earn workers of color and women. These trends hold even when controlling for educational attainment and within many occupational groups.

**FIGURE 11: MEDIAN INCOME BY RACE/ETHNICITY AND SEX FOR FULL-TIME WORKERS AGES 25 AND OVER WITH POSITIVE INCOME, 2021**

# INCOME & WEALTH

The median household income in Deep River is \$79,090, compared to \$83,572 statewide. Racial disparities in outcomes related to education, housing, employment, and wages result in disparate household-level incomes and overall wealth. Households led by Black or Latino adults generally average lower incomes than white households.

**FIGURE 12: MEDIAN HOUSEHOLD INCOME BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2021**

Between the Great Recession and the COVID-19 pandemic, average incomes have not kept pace with inflation over the past two decades. Connecticut’s median household income was \$83,572 in 2021; adjusted for inflation, this was \$1,365 lower than in 2000.

**FIGURE 13: MEDIAN HOUSEHOLD INCOME, 2000–2021, IN 2021 DOLLARS**

The Supplemental Nutritional Assistance Program (SNAP, or food stamps) is a program available to very low-income households earning less than 130 percent of the federal poverty guideline (\$26,500 for a family of four in 2021). Throughout the state, poverty and SNAP utilization rates are higher among Black and Latino households than white households.

With many of the safety measures early in the COVID-19 pandemic, having reliable, high-speed internet at home became a necessity for remote participation in school, expanded job opportunities, and telehealth. Statewide, Black and Latino residents are slightly more likely than average to live in a household without broadband access.

Access to a personal vehicle may also be considered a measure of financial security since reliable transportation plays a significant role in job access and quality of life. Vehicle access reduces the time a family may spend running errands or traveling to appointments, school, or work.

**TABLE 7: SELECTED ECONOMIC RESOURCES BY RACE/ETHNICITY, 2021**

# HEALTH

The socioeconomic disparities described above tend to correlate with health outcomes. Factors such as stable housing, employment, literacy and linguistic fluency, environmental hazards, and transportation all impact access to care, physical and mental health outcomes, and overall quality of life. Income and employment status often drive differences in access to healthcare, the likelihood of getting preventive screenings as recommended, the affordability of life-saving medicines, and the ability to purchase other goods and services, including high-quality housing and nutritious food.

Life expectancy is a good proxy for overall health and well-being since it is the culmination of so many other social and health factors. The average life expectancy in Deep River is 77.9 years, compared to 81.0 years across Middlesex County and 80.3 years statewide.

**FIGURE 14: LIFE EXPECTANCY, MIDDLESEX COUNTY BY CENSUS TRACT, 2015**

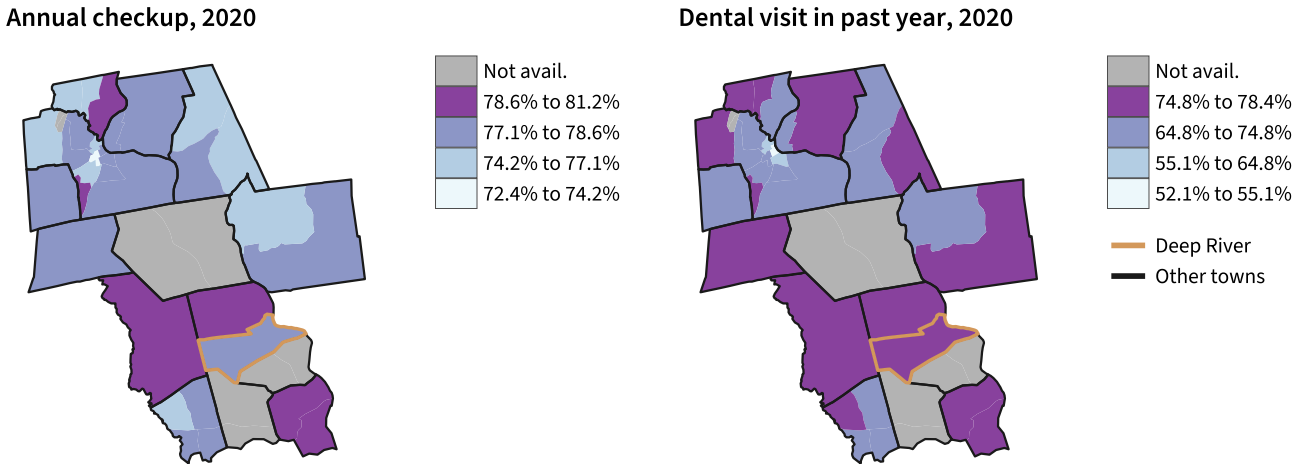

Health-related challenges begin with access to care. Due to differences in workplace benefits, income, and eligibility factors, Black and especially Latino people are less likely to have health insurance than white people.

**FIGURE 15: UNINSURED RATE AMONG ADULTS AGES 19–64 BY RACE/ETHNICITY, 2021**

Preventive care can help counteract economic disadvantages, as a person’s health can be improved by addressing risk factors like hypertension and chronic stress early. Lack of affordable, accessible, and consistent medical care can lead to residents relying on expensive emergency room visits later on. Overall, 77 percent of the adults in Deep River had an annual checkup as of 2020, and 77 percent had had a dental visit in the past year.

**FIGURE 16: PREVENTIVE CARE MEASURES, SHARE OF ADULTS BY CENSUS TRACT, MIDDLESEX COUNTY**

Throughout the state, people of color face greater rates and earlier onset of many chronic diseases and risk factors, particularly those that are linked to socioeconomic status and access to resources. For example, diabetes is much more common among older adults than younger ones, yet middle-aged Black adults in Connecticut have higher diabetes rates than white seniors.

**FIGURE 17: SELECTED HEALTH RISK FACTORS, SHARE OF ADULTS, 2015–2021**

FIGURE 18: CHRONIC DISEASE PREVALENCE, SHARE OF ADULTS BY CENSUS TRACT, MIDDLESEX COUNTY

High blood pressure, 2019

Coronary heart disease, 2020

Current asthma, 2020

Diabetes, 2020

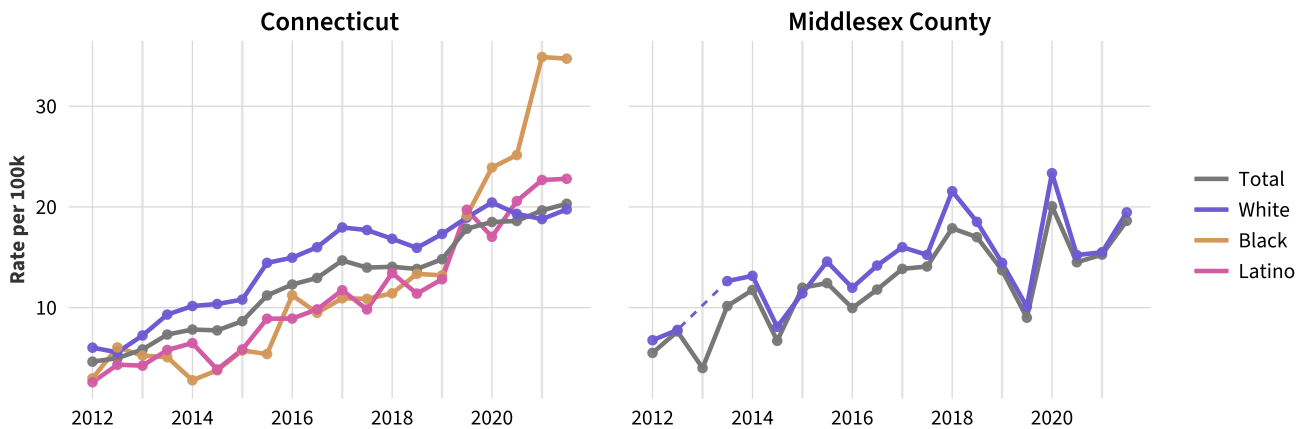

Mental health issues like depression and anxiety can be linked to social determinants like income, employment, and environment, and can pose risks of physical health problems as well, including by complicating a person’s ability to keep up other aspects of their health care. People of color are slightly more likely to report feeling mostly or completely anxious and being bothered by feeling depressed or hopeless. Overall, 12 percent of Middlesex County adults report experiencing anxiety regularly and 11 percent report being bothered by depression.

**TABLE 9: SELECTED MENTAL HEALTH INDICATORS, SHARE OF ADULTS, 2015–2021**

	Total	White	Black	Latino	Asian

Connecticut	9%	8%	10%	14%	9%
Middlesex County	11%	8%	11%	23%	N/A

Like other states, Connecticut has seen a rise in drug overdose deaths in the last several years. In 2021, Connecticut saw an average of 122 overdose deaths per month, up from 59 in 2015. White residents long comprised the bulk of these deaths, but as overall overdose death rates have increased, an increasing share of those deaths have been people of color.

**FIGURE 19: AGE-ADJUSTED SEMI-ANNUAL RATES OF DRUG OVERDOSE DEATHS PER 100,000 RESIDENTS BY RACE/ETHNICITY, 2012–2021**

Note: Values are suppressed for small populations or few overdose incidents. Dashed lines indicate periods where values are suppressed or otherwise unavailable.

The introduction and spread of fentanyl in drugs—both with and without users’ knowledge—is thought to have contributed to this steep rise in overdoses. In 2016 and 2017, 64 percent of the drug overdose deaths in Middlesex County involved fentanyl; in 2020 and 2021, this share was 81 percent.

**FIGURE 20: SHARE OF DRUG OVERDOSE DEATHS INVOLVING FENTANYL, 2012–2021**

Sexually transmitted infections (STIs) can have long-term implications for health, including reproductive health problems and certain cancers, and can increase the risk of acquiring and transmitting diseases such as HIV and hepatitis C. Following nationwide trends, Connecticut has seen increases in the rates of STIs like chlamydia and gonorrhea over the past two decades. Between 2018 and 2020, Middlesex County had annual average case rates of 258 new cases of chlamydia per 100,000 residents, 72 cases of gonorrhea per 100,000, and 5.5 cases of syphilis per 100,000.

**FIGURE 21: ANNUALIZED AVERAGE RATES OF NEW CASES OF SELECTED SEXUALLY TRANSMITTED INFECTIONS PER 100,000 RESIDENTS, 2000–2020**

As with many other diseases, Connecticut’s Black and Latino residents face a higher burden of HIV rates. Statewide between 2016 and 2020, Black residents ages 13 and up were nearly 10 times more likely to be diagnosed with HIV than white residents.

**FIGURE 22: ANNUALIZED AVERAGE RATE OF NEW HIV DIAGNOSES PER 100,000 RESIDENTS AGES 13 AND OVER, 2016–2020**

Birth outcomes often reflect health inequities for parents giving birth, and those outcomes can affect a child throughout their life. Often, parents of color have more complications related to birth and pregnancy than white parents. Complications during pregnancy or childbirth also contribute to elevated mortality among parents giving birth.

**TABLE 10: SELECTED BIRTH OUTCOMES BY RACE/ETHNICITY OF PARENT GIVING BIRTH, 2017–2021**

Area	Total	White	Black	Latina			Asian
				Latina (overall)	Puerto Rican	Other Latina

**FIGURE 23: MATERNAL MORTALITY RATE PER 100K BIRTHS, CONNECTICUT, 2013–2017**

Children under 7 years old are monitored annually for potential lead poisoning, based on having blood-lead levels in excess of the state’s accepted threshold. Between 2018 and 2020, 0.6 percent of children tested in Middlesex County were found to have elevated lead levels. Children living in homes built before 1960 are at a higher risk of potential lead poisoning due to the more widespread use of lead-based paints in older homes. Black and Latino households are more likely to live in structures built before 1960.

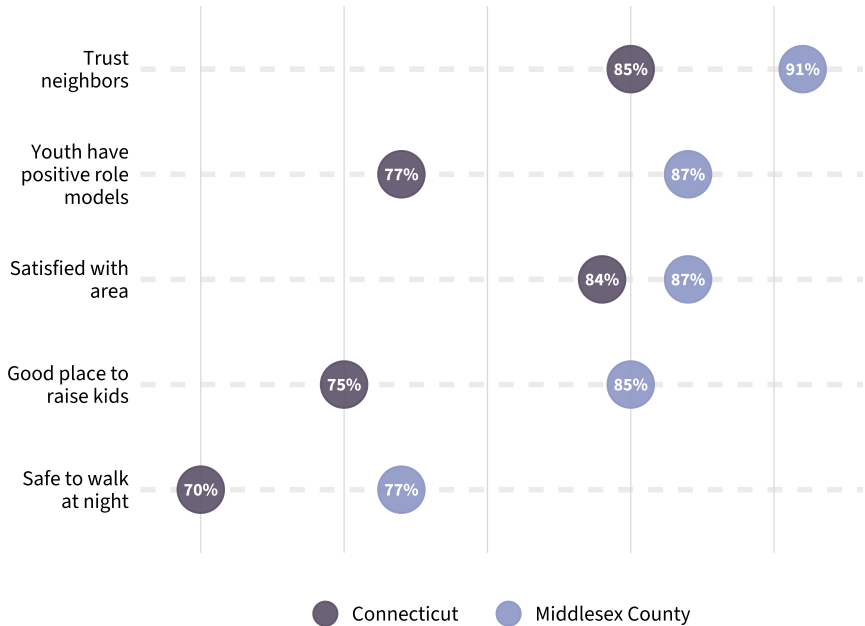

**TABLE 11: HOUSEHOLDS LIVING IN STRUCTURES BUILT BEFORE 1960 BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2021**

Area	Total		White		Black		Latino		Asian		Other race

# CIVIC LIFE & COMMUNITY COHESION

Beyond individual health, several measures from the DataHaven Community Wellbeing Survey show how local adults feel about the health of their neighborhoods. High quality of life and community cohesion can positively impact resident well-being through the availability of resources, sense of safety, and participation in civic life. For example, adults who see the availability of role models in their community may enroll their children in extracurricular activities that benefit them educationally and socially; residents who know and trust their neighbors may find greater social support. Overall, 93 percent of Deep River adults report being satisfied with the area where they live.

**FIGURE 24: RESIDENTS' RATINGS OF COMMUNITY COHESION MEASURES, SHARE OF ADULTS, 2015-2021**

Crime rates are based on reports to law enforcement of violent force against persons, as well as offenses involving property. Not all crimes involve residents of the areas where the crimes occur, which is important to consider when evaluating crime rates in areas or towns with more commercial activity. Crime patterns can also vary dramatically by neighborhood. Crime can impact the social and economic well-being of communities, including through negative health effects.

**FIGURE 25: GROUP A CRIME RATES PER 100,000 RESIDENTS BY TOWN / JURISDICTION, 2021**

A lack of trust in and engagement with local government and experiences of unfair treatment by authorities can impair community well-being and cohesion. Eighty-five percent of adults in Deep River feel their local government is responsive to residents’ needs, compared to 53 percent of Connecticut adults.

**TABLE 12: RESIDENTS’ RATINGS OF LOCAL GOVERNMENT, SHARE OF ADULTS, 2015–2021**

Area	Local govt is responsive	Have some influence over local govt
Connecticut	53%	67%
Middlesex County	58%	68%

Eighty-four percent of Deep River’s eligible voters, or 2,902 people, voted in the 2020 presidential election, and 86 percent (5,888 people) voted in the 2022 state election.

**FIGURE 26: REGISTERED VOTER TURNOUT, 2020–2022**

# ENVIRONMENT & SUSTAINABILITY

Many environmental factors—from access to outdoor resources to tree canopy to exposure to pollutants—can have direct impacts on residents’ health and quality of life. Environmental justice is the idea that these factors of built and natural environments follow familiar patterns of socioeconomic disparities and segregation. The federal Environmental Protection Agency (EPA) ranks small areas throughout the US on their risks of exposure to a variety of pollutants and hazards, scaled to account for the historically disparate impact of these hazards on people of color and lower-income people.

**FIGURE 27: EPA ENVIRONMENTAL JUSTICE INDEX BY BLOCK GROUP, MIDDLESEX COUNTY**

**Air toxics cancer risk**

**Lead paint exposure**

**Hazardous waste proximity**

**Wastewater discharge**

High-quality built environment resources, such as recreational facilities and safe sidewalks, help keep residents active and bring communities together. Walkable neighborhoods may also encourage decreased reliance on cars. Throughout Connecticut, Black and Latino residents are largely concentrated in denser urban areas which tend to offer greater walkability. Of adults in Middlesex County, 47 percent report having stores, banks, and other locations they need in walking distance, lower than the share of adults statewide.

**FIGURE 28: RESIDENTS' RATINGS OF LOCAL WALKABILITY MEASURES BY RACE/ETHNICITY, SHARE OF ADULTS, 2015–2021**

**Figure 2. Population by race/ethnicity and age group, 2021.** DataHaven analysis (2023) of US Census Bureau American Community Survey 2021 5-year estimates.

**Figure 3. Linguistic isolation by race/ethnicity, 2021.** DataHaven analysis (2023) of US Census Bureau American Community Survey 2021 5-year estimates.

**Table 3. Population and population change by age group, 2010–2020.** US Census Bureau 2010 & 2020 Decennial Census P.L. 94-171 Redistricting Data.

**Figure 4. Share of population by race/ethnicity, 2010–2020.** US Census Bureau 2010 & 2020 Decennial Census P.L. 94-171 Redistricting Data.

**Table 4. Homeownership rate by race/ethnicity of head of household, 2021.** DataHaven analysis (2023) of US Census Bureau American Community Survey 2021 5-year estimates.

**Figure 5. Homeownership rates by age and race/ethnicity of head of household, Middlesex County, 2021.** DataHaven analysis (2023) of US Census Bureau American Community Survey 2021 5-year public use microdata sample (PUMS) data, accessed via IPUMS. Steven Ruggles, Sarah Flood, Matthew Sobek, Danika Brockman, Grace Cooper, Stephanie Richards, and Megan Schouweiler. IPUMS USA: Version 13.0 [dataset]. Minneapolis, MN: IPUMS, 2023. <https://doi.org/10.18128/D010.V13.0>

**Figure 6. Housing cost-burden rates by race/ethnicity, 2021.** DataHaven analysis (2023) of Ruggles, et al. (2023).

**Table 5. Overcrowded households by race/ethnicity of head of household, 2021.** DataHaven analysis (2023) of US Census Bureau American Community Survey 2021 5-year estimates.

**Figure 7. Public K–12 student enrollment by race/ethnicity per 100 students, 2022-23.** DataHaven analysis (2023) of enrollment data from the Connecticut State Department of Education, accessed via EdSight at <http://edsight.ct.gov>. At the school district level, not all groups may be shown due to CTSDE data suppression rules for small enrollment counts, even though they may represent more than 1% of the school district population.

**Figure 8. Selected academic and disciplinary outcomes by student race/ethnicity, 2020-21 and 2021-22 school years.** DataHaven analysis (2023) of Smarter Balanced Assessment Consortium (SBAC) testing (3rd and 8th grade English/language arts), discipline, and four-year graduation data from the Connecticut State Department of Education, accessed via EdSight. Not all groups' values may be included, or in some cases may be based on estimates, due to CTSDE data suppression rules for small counts. Because students can be suspended more than once in a school year, the suspension rate represents the percentage of students with one or more suspension or expulsion during the school year.

**Figure 9. Educational attainment by race/ethnicity, share of adults ages 25 and up, 2021.** DataHaven analysis (2023) of US Census Bureau American Community Survey 2021 5-year estimates.

**Table 6. Jobs and wages in Deep River’s 5 largest sectors, 2021.** DataHaven analysis (2023) of annual employment data from the Connecticut Department of Labor. Note that in some cases, especially for smaller towns or where data were deemed unreliable for whatever reason, data have been suppressed by the department. In a few cases, that may mean large sectors in an area are missing from the analysis here. Available at [https://www1.ctdol.state.ct.us/lmi/202/202\\_annualaverage.asp](https://www1.ctdol.state.ct.us/lmi/202/202_annualaverage.asp)
