Compiled by DataHaven in August 2021.

This report is designed to inform local-level efforts to improve community well-being and racial equity. This represents version 1.0 of the DataHaven town equity profile, which DataHaven has published for all 169 towns and several regions of Connecticut. Please contact DataHaven with suggestions for version 2.0 of this report.

ctdatahaven.org

EXECUTIVE SUMMARY

Throughout most of the measures in this report, there are important differences by race/ethnicity and neighborhood that reflect differences in access to resources and other health-related social needs. Wherever possible, data will be presented with racial/ethnic breakdowns. Data for white, Black, Asian, and other populations represent non-Hispanic members of each racial group.

- Monroe is a town of **18,825 residents**, **17 percent** of whom are people of color. The town's population has decreased by **3.4 percent** since 2010.
- Of the town's **6,673 households**, **91 percent** are homeowner households.
- **Thirty-six percent** of Monroe's households are cost-burdened, meaning they spend at least 30 percent of their total income on housing costs.
- **Ninety-eight percent** of public high school seniors in the Monroe School District graduated within four years in 2019.
- Among the town's adults ages 25 and up, **49 percent** have earned a bachelor's degree or higher.
- Monroe is home to **5,482 jobs**, with the largest share in the Retail Trade sector.
- Monroe's average life expectancy is **81.6 years**.
- **Sixty-eight percent** of adults in Monroe say they are in excellent or very good health.
- **Eighty-one percent** of adults in Monroe are satisfied with their area, and **56 percent** say their local government is responsive to residents' needs.
- In the 2020 presidential election, **86 percent** of registered voters in Monroe voted.
- **Thirty-six percent** of adults in Monroe report having stores, banks, and other locations in walking distance of their home, and **16 percent** say there are safe sidewalks and crosswalks in their neighborhood.

OVERVIEW

For the purposes of this report, Monroe will be compared to Connecticut as a whole, as well as to the towns in the surrounding Public Use Microdata Area (PUMA) designated by the US Census Bureau with the number 0900105. In addition, data are presented for Fairfield County where sample sizes are otherwise small.

FIGURE 1: STUDY AREA

PUMA 0900105 is made up of the following towns (with 2020 populations):

- Monroe (18,825)
- Newtown (27,173)
- Shelton (40,869)
- Stratford (52,355)
- Trumbull (36,827)

Fairfield County is made up of the following towns (with 2020 populations):

- Bethel (20,358)
- Bridgeport (148,654)
- Brookfield (17,528)
- Danbury (86,518)
- Darien (21,499)
- Easton (7,605)
- Fairfield (61,512)
- Greenwich (63,518)
- Monroe (18,825)
- New Canaan (20,622)
- New Fairfield (13,579)
- Newtown (27,173)
- Norwalk (91,184)
- Redding (8,765)
- Ridgefield (25,033)
- Shelton (40,869)
- Sherman (3,527)
- Stamford (135,470)
- Stratford (52,355)
- Trumbull (36,827)
- Weston (10,354)
- Westport (27,141)
- Wilton (18,503)

TABLE 1: ABOUT THE AREA

| Indicator | Connecticut | PUMA 0900105 | Monroe |
|---|-------------|--------------|-----------|
| Total population | 3,605,944 | 176,049 | 18,825 |
| Total households | 1,370,746 | 64,790 | 6,673 |
| Homeownership rate | 66% | 84% | 91% |
| Housing cost burden rate | 36% | 34% | 36% |
| Adults with less than a high school diploma | 9% | 6% | 4% |
| Median household income | \$78,444 | \$101,730 | \$118,669 |
| Poverty rate | 10% | 5% | 3% |
| Life expectancy (years) | 80.3 | 81.3 | 81.6 |
| Adults w/o health insurance | 10% | 8% | 7% |

DEMOGRAPHICS

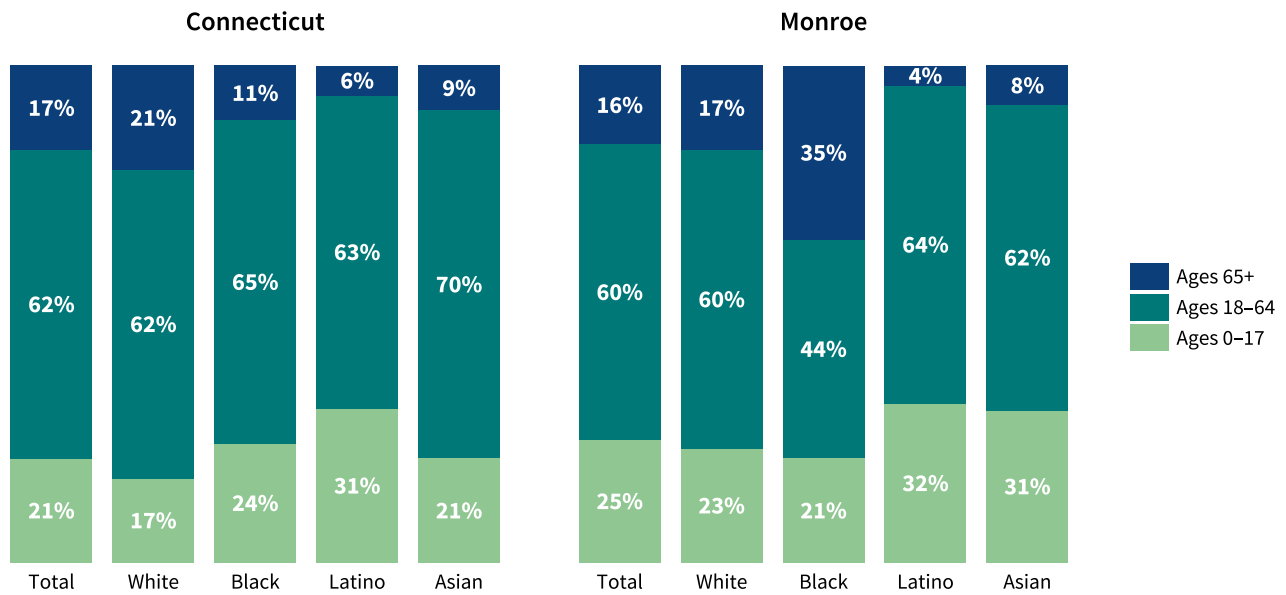

As of 2020, the population of Monroe is 18,825, including 4,276 children and 14,549 adults. Seventeen percent of Monroe’s residents are people of color, compared to 37 percent of the residents statewide.

TABLE 2: POPULATION BY RACE/ETHNICITY, 2020

| Area | White | | Black | | Latino | | Asian | | Native American | | Other race/ethnicity | |
|--------------|-----------|-------|---------|-------|---------|-------|---------|-------|-----------------|-------|----------------------|-------|
| | Count | Share | Count | Share | Count | Share | Count | Share | Count | Share | Count | Share |
| Connecticut | 2,279,232 | 63% | 360,937 | 10% | 623,293 | 17% | 170,459 | 5% | 6,404 | <1% | 165,619 | 5% |
| PUMA 0900105 | 126,258 | 72% | 13,582 | 8% | 21,919 | 12% | 7,013 | 4% | 137 | <1% | 7,140 | 4% |
| Monroe | 15,548 | 83% | 400 | 2% | 1,470 | 8% | 660 | 4% | <50 | N/A | 727 | 4% |

As Connecticut’s predominantly white Baby Boomers age, younger generations are driving the state’s increased racial and ethnic diversity. Black and Latino populations in particular skew much younger than white populations.

FIGURE 2: POPULATION BY RACE/ETHNICITY AND AGE GROUP, 2019

Note: Only groups with at least 50 residents shown.

About 1,942 residents of Monroe, or 10 percent of the population, are foreign-born. The largest number of immigrants living in PUMA 0900105 were born in India, followed by Portugal and Italy.

Linguistic isolation is characterized as speaking English less than “very well.” People who struggle with English proficiency may have difficulty in school, seeking health care, accessing social services, or finding work in a largely English-speaking community. As of 2019, 533 Monroe residents, or 3 percent of the population age 5 and older, were linguistically isolated. Latinos and Asian Americans are more likely to be linguistically isolated than other racial/ethnic groups.

FIGURE 3: LINGUISTIC ISOLATION BY RACE/ETHNICITY, 2019

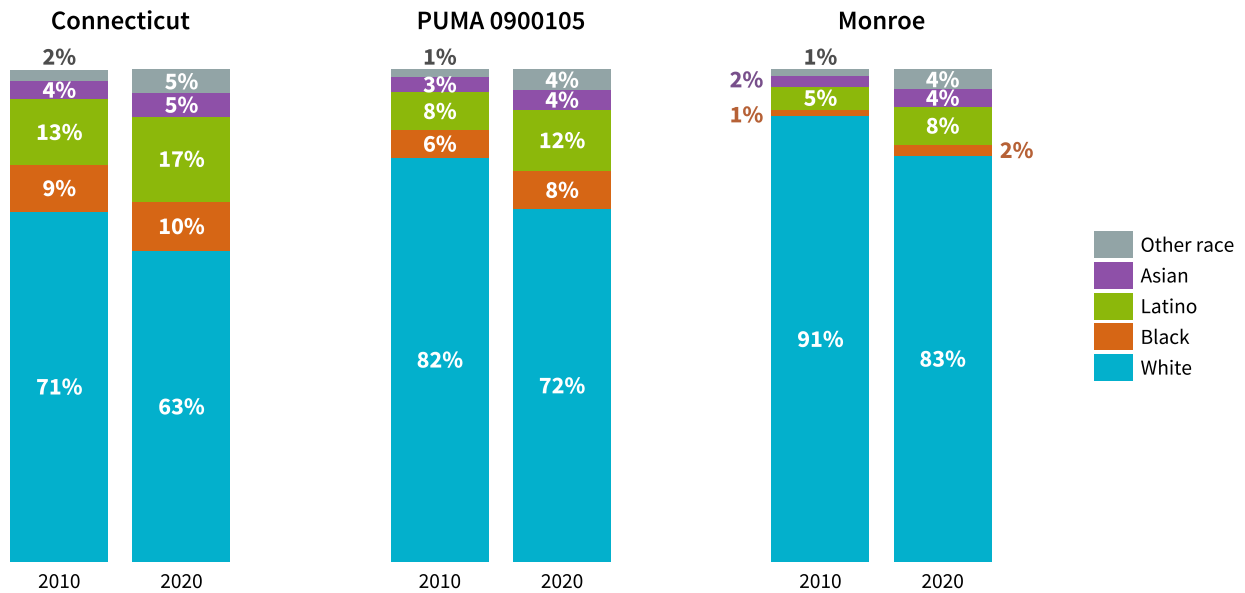

POPULATION CHANGE: 2020 CENSUS

The first set of data from the 2020 Census was released in August 2021, containing basic population counts by age and race/ethnicity. Between 2010 and 2020, Connecticut’s population was nearly stagnant. During the same period, Monroe shrank by 654 people, a 3.4 percent decrease. The number of white residents in Monroe shrank by 12 percent, while the non-white population grew by 79 percent.

TABLE 3: POPULATION AND POPULATION CHANGE BY AGE GROUP, 2010–2020

| Area | Age | Population, 2010 | Population, 2020 | Change | Percent change |
|--------------|----------|------------------|------------------|----------|----------------|
| Connecticut | All ages | 3,574,097 | 3,605,944 | +31,847 | +0.9% |
| | Children | 817,015 | 736,717 | -80,298 | -9.8% |
| | Adults | 2,757,082 | 2,869,227 | +112,145 | +4.1% |
| PUMA 0900105 | All ages | 174,000 | 176,049 | +2,049 | +1.2% |
| | Children | 41,642 | 36,723 | -4,919 | -11.8% |
| | Adults | 132,358 | 139,326 | +6,968 | +5.3% |
| Monroe | All ages | 19,479 | 18,825 | -654 | -3.4% |
| | Children | 5,165 | 4,276 | -889 | -17.2% |
| | Adults | 14,314 | 14,549 | +235 | +1.6% |

FIGURE 4: SHARE OF POPULATION BY RACE/ETHNICITY, 2010–2020

HOUSING

Monroe has 6,673 households, of which 91 percent are homeowner households. Of Monroe’s 7,013 housing units, 91 percent are single-family and 8 percent are multifamily, compared to PUMA 0900105, where 83 percent are single-family and 17 percent are multifamily.

Homeownership rates vary by race/ethnicity. Purchasing a home is more attainable for advantaged groups because the process of purchasing a home has a long history of racially discriminatory practices that continue to restrict access to homeownership today. This challenge, coupled with municipal zoning dominated by single-family housing, results in de facto racial and economic segregation seen throughout Connecticut.

TABLE 4: HOMEOWNERSHIP RATE BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

| Area | Total | White | Black | Latino | Asian | Native American |
|--------------|-------|-------|-------|--------|-------|-----------------|
| Connecticut | 66% | 76% | 39% | 34% | 58% | 40% |
| PUMA 0900105 | 84% | 87% | 60% | 70% | 77% | 81% |
| Monroe | 91% | 92% | 86% | 76% | 82% | N/A |

Younger adults are less likely than older adults to own their homes across several race/ethnicity groups. However, in most towns, younger white adults own their homes at rates comparable to or higher than older Black and Latino adults.

FIGURE 5: HOMEOWNERSHIP RATES BY AGE AND RACE/ETHNICITY OF HEAD OF HOUSEHOLD, PUMA 0900105, 2019

A household is cost-burdened when they spend 30 percent or more of their income on housing costs, and severely cost-burdened when they spend half or more of their income on housing costs. Housing costs continue to rise, due in part to municipal zoning measures that limit new construction to very few towns statewide. Meanwhile, wages have largely stagnated, especially among lower-income workers who are more likely to rent. As a result, cost-burden generally affects renters more than homeowners, and has greater impact on Black and Latino householders. Among renter households in Monroe, 62 percent are cost-burdened, compared to 33 percent of owner households.

FIGURE 6: HOUSING COST-BURDEN RATES BY RACE/ETHNICITY, PUMA 0900105, 2019

Household overcrowding is defined as having more than one occupant per room. Overcrowding may increase the spread of illnesses among the household and can be associated with higher levels of stress. Increasing the availability of appropriately-sized affordable units helps to alleviate overcrowding.

TABLE 5: OVERCROWDED HOUSEHOLDS BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

| Area | Total | | White | | Black | | Latino | | Asian | | Native American | |
|--------------|--------|-------|-------|-------|-------|-------|--------|-------|-------|-------|-----------------|-------|

EDUCATION

Public school students in Monroe are served by the Monroe School District for pre-kindergarten through grade 12. During the 2019–2020 school year, there were 3,136 students enrolled in the Monroe School District. Tracking student success measures is important since disparate academic and disciplinary outcomes are observed as early as preschool and can ultimately affect a person’s long-term educational attainment and economic potential.

FIGURE 7: PUBLIC K–12 STUDENT ENROLLMENT BY RACE/ETHNICITY PER 100 STUDENTS, 2019–2020

FIGURE 8: SELECTED ACADEMIC AND DISCIPLINARY OUTCOMES BY STUDENT RACE/ETHNICITY, 2018–2019

Adults with high school diplomas or college degrees have more employment options and considerably higher potential earnings, on average, than those who do not finish high school. In Monroe, 4 percent of adults ages 25 and over, or 576 people, lack a high school diploma; statewide, this value is 9 percent.

FIGURE 9: EDUCATIONAL ATTAINMENT BY RACE/ETHNICITY, SHARE OF ADULTS AGES 25 AND UP, 2019

ECONOMY

There are 5,482 total jobs in Monroe, with the largest share in the Retail Trade sector. While these numbers are from 2019 and do not include economic outcomes related to the COVID-19 pandemic, they describe general labor market strengths and average wages for the area.

TABLE 6: JOBS AND WAGES IN MONROE’S 5 LARGEST SECTORS, 2019

| Sector | Connecticut | | Monroe | |
|-----------------------------------|-------------|----------------|------------|----------------|
| | Total jobs | Avg annual pay | Total jobs | Avg annual pay |
| All Sectors | 1,670,354 | \$69,806 | 5,482 | \$51,385 |
| Retail Trade | 175,532 | \$35,833 | 834 | \$37,640 |
| Manufacturing | 161,893 | \$85,031 | 778 | \$54,113 |
| Accommodation and Food Services | 129,012 | \$23,183 | 735 | \$17,819 |
| Health Care and Social Assistance | 271,014 | \$54,858 | 436 | \$53,356 |
| Wholesale Trade | 59,702 | \$97,720 | 422 | \$82,626 |

Individual earnings vary by race/ethnicity, sex, and other characteristics. These can be measured comparing the differences in average earnings between groups. White workers and men often out-earn workers of color and women. These trends hold even when controlling for educational attainment.

FIGURE 10: MEDIAN INCOME BY RACE/ETHNICITY AND SEX FOR FULL-TIME WORKERS AGES 25 AND OVER WITH POSITIVE INCOME, 2019

Rates of unemployment also vary by race and ethnicity. Generally, workers of color are more likely to be unemployed due to factors ranging from hiring practices to proximity to available jobs. Overall unemployment in Monroe averaged 2 percent in 2019.

FIGURE 11: UNEMPLOYMENT RATE BY RACE/ETHNICITY, 2019

INCOME & WEALTH

The median household income in Monroe is \$118,669, compared to \$78,444 statewide. Racial disparities in outcomes related to education, housing, and wages result in disparate household-level incomes and overall wealth. Racial disparities in outcomes related to education, employment, and wages result in disparate household-level incomes and overall wealth. Households led by Black or Latino adults generally average lower incomes than white households.

FIGURE 12: MEDIAN HOUSEHOLD INCOME BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

The Supplemental Nutritional Assistance Program (SNAP, or food stamps) is a program available to very low-income households earning less than 130 percent of the federal poverty guideline (\$25,750 for a family of four in 2019). Throughout the state, poverty and SNAP utilization rates are higher among Black and Latino households than white households.

TABLE 7: SELECTED HOUSEHOLD ECONOMIC INDICATORS BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

| | Total | | White | | Black | | Latino | | Asian | | Native American | |

Access to a personal vehicle may also be considered a measure of wealth since reliable transportation plays a significant role in job access and quality of life. Vehicle access reduces the time a family may spend running errands or traveling to appointments, school, or work.

TABLE 8: HOUSEHOLDS WITH NO VEHICLE AT HOME BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

| Monroe | 226 | 4% | N/A | N/A | N/A | N/A | N/A | N/A | N/A | N/A |

Over the past 40 years, neighborhood income inequality has grown statewide as the share of the population living in wealthy or poor neighborhoods has increased and the population in middle income areas declined in a process known as “economic sorting,” which often leads to further disparities in access to economic opportunity, healthy environments, and municipal resources.

FIGURE 13: DISTRIBUTION OF POPULATION BY NEIGHBORHOOD INCOME LEVEL, PUMA 0900105, 1980–2019

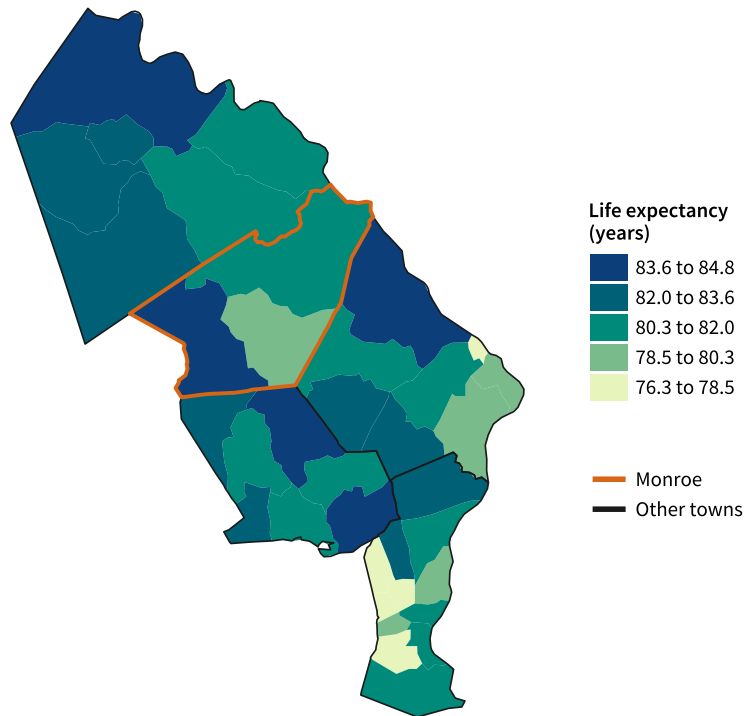

HEALTH

The socioeconomic disparities described above tend to correlate with health outcomes. Factors such as stable housing, employment, literacy and linguistic fluency, environmental hazards, and transportation all impact access to care, physical and mental health outcomes, and overall quality of life. Income and employment status often drive differences in access to healthcare, the likelihood of getting preventive screenings as recommended, the affordability of life-saving medicines, and the ability to purchase other goods and services, including high-quality housing and nutritious food.

Life expectancy is a good proxy for overall health and well-being since it is the culmination of so many other social and health factors. The average life expectancy in Monroe is 81.6 years, compared to 81.3 years across PUMA 0900105, and 80.3 years statewide.

FIGURE 14: LIFE EXPECTANCY, PUMA 0900105 BY CENSUS TRACT, 2015

Health-related challenges begin with access to care. Due to differences in workplace benefits, income, and eligibility factors, Black and especially Latino people are less likely to have health insurance than white people.

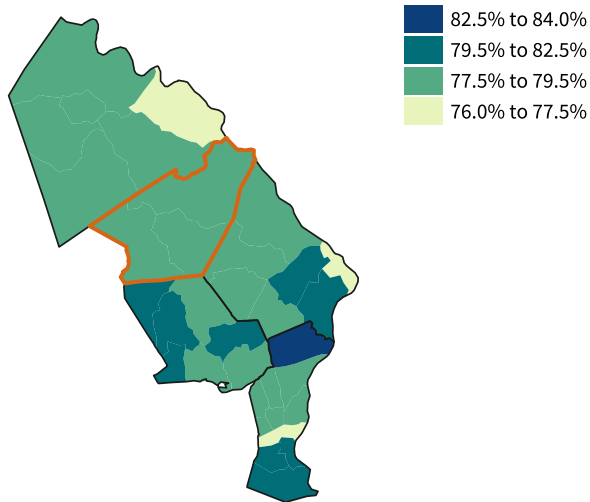

FIGURE 15: UNINSURED RATE AMONG ADULTS AGES 19–64 BY RACE/ETHNICITY, 2019

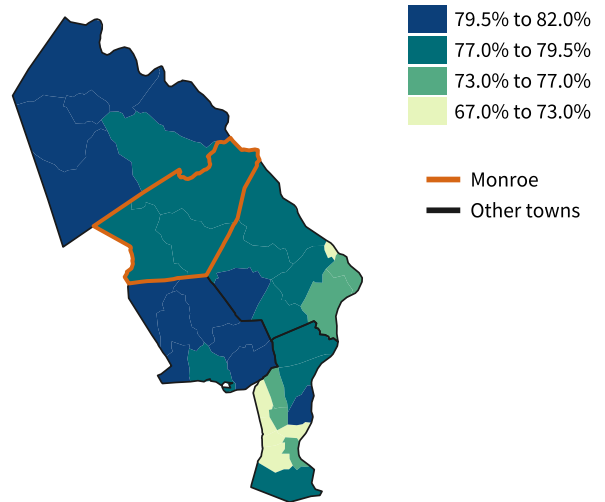

Preventive care can help counteract economic disadvantages, as a person’s health can be improved by addressing risk factors like hypertension and chronic stress early. Lack of affordable, accessible, and consistent medical care can lead to residents relying on expensive emergency room visits later on. Overall, 78 percent of the adults in Monroe had an annual checkup as of 2018, and 79 percent had a dental visit in the past year.

FIGURE 16: PREVENTIVE CARE MEASURES, SHARE OF ADULTS BY CENSUS TRACT, PUMA 0900105

Annual checkup, 2018

Dental visit in past year, 2018

Throughout the state, people of color face greater rates and earlier onset of many chronic diseases and risk factors, particularly those that are linked to socioeconomic status and access to resources. For example, diabetes is much more common among older adults than younger ones, yet middle-aged Black adults in Connecticut have higher diabetes rates than white seniors.

FIGURE 17: SELECTED HEALTH RISK FACTORS, SHARE OF ADULTS, 2015–2018

Mental health issues like depression and anxiety can be linked to social determinants like income, employment, and environment, and can pose risks of physical health problems as well, including by complicating a person’s ability to keep up other aspects of their health care. People of color are slightly more likely to report feeling mostly or completely anxious and being bothered by feeling depressed or hopeless. Overall, 12 percent of Monroe adults report experiencing anxiety regularly and 3 percent report being bothered by depression.

TABLE 9: SELECTED MENTAL HEALTH INDICATORS, SHARE OF ADULTS, 2015–2018

Like other states, Connecticut has seen a rise in drug overdose deaths in the last several years. In 2020, Connecticut saw an average of 113 overdose deaths per month, up from 60 in 2015. White residents long comprised the bulk of these deaths, but as overall overdose death rates have increased, an increasing share of those deaths have been people of color.

FIGURE 20: AGE-ADJUSTED SEMI-ANNUAL RATES OF DRUG OVERDOSE DEATHS PER 100,000 RESIDENTS BY RACE/ETHNICITY, 2015–2020

Note: Values suppressed for small populations or few overdose incidents.

The introduction and spread of fentanyl in drugs—both with and without users’ knowledge—is thought to have contributed to this steep rise in overdoses. In 2015 and 2016, 55 percent of the drug overdose deaths in 0900105 involved fentanyl; in 2019 and 2020, this share was 86 percent.

FIGURE 21: SHARE OF DRUG OVERDOSE DEATHS INVOLVING FENTANYL, 2015–2020

Sexually transmitted infections (STIs) can have long-term implications for health, including reproductive health problems and certain cancers, and can increase the risk of acquiring and transmitting diseases such as HIV and hepatitis C. Following nationwide trends, Connecticut has seen increases in the rates of STIs like chlamydia and gonorrhea over the past two decades. Between 2016 and 2018, Fairfield County had annual average case rates of 366 new cases of chlamydia per 100,000 residents, 72 cases of gonorrhea per 100,000, and 3.2 cases of syphilis per 100,000.

FIGURE 22: ANNUALIZED AVERAGE RATES OF NEW CASES OF SELECTED SEXUALLY TRANSMITTED INFECTIONS PER 100,000 RESIDENTS, 2001–2003 THROUGH 2016–2018

Like many other diseases, Connecticut's Black and Latino residents face a higher burden of HIV rates. Statewide between 2016 and 2018, Black residents ages 13 and up were more than 10 times more likely to be diagnosed with HIV than white residents.

FIGURE 23: ANNUALIZED AVERAGE RATE OF NEW HIV DIAGNOSES PER 100,000 RESIDENTS AGES 13 AND OVER, 2016-2018

Birth outcomes often reflect health inequities for parents giving birth, and those outcomes can affect a child throughout their life. Often, parents of color have more complications related to birth and pregnancy than white parents. Complications during pregnancy or childbirth also contribute to elevated mortality among parents giving birth.

Children under 7 years old are monitored annually for potential lead poisoning, based on having blood-lead levels in excess of the state's accepted threshold. Between 2013 and 2017, fewer than 5 children in Monroe tested positive for elevated lead levels. Children living in homes built before 1960 are at a higher risk of potential lead poisoning due to the more widespread use of lead-based paints in older homes. Black and Latino households are slightly more likely to live in structures built before 1960.

TABLE 11: HOUSEHOLDS LIVING IN STRUCTURES BUILT BEFORE 1960 BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

CIVIC LIFE & COMMUNITY COHESION

Beyond individual health, several measures from the DataHaven Community Wellbeing Survey show how local adults feel about the health of their neighborhoods. High quality of life and community cohesion can positively impact resident well-being through the availability of resources, sense of safety, and participation in civic life. For example, adults who see the availability of role models in their community may enroll their children in extracurricular activities that benefit them educationally and socially; residents who know and trust their neighbors may find greater social support. Overall, 81 percent of Monroe adults reported being satisfied with the area where they live.

FIGURE 25: RESIDENTS' RATINGS OF COMMUNITY COHESION MEASURES, SHARE OF ADULTS, 2015-2018

Crime rates per 100,000 residents are based on reports to law enforcement of violent force against persons, as well as offenses involving property. Not all crimes involve residents of the areas where the crimes occur, which is important to consider when evaluating crime rates in areas or towns with more commercial activity. Crime patterns can also vary dramatically by neighborhood. Crime can impact the social and economic well-being of communities, including through negative health effects.

FIGURE 26: PART I CRIME RATES PER 100,000 RESIDENTS BY TOWN / JURISDICTION, 2019

Crimes against persons

Crimes against property

A lack of trust in and engagement with local government and experiences of unfair treatment by authorities can impair community well-being and cohesion. Fifty-six percent of Monroe adults feel their local government is responsive to residents’ needs, compared to 51 percent statewide.

TABLE 12: RESIDENTS’ RATINGS OF LOCAL GOVERNMENT, SHARE OF ADULTS, 2015–2018

| Area | Unfairly stopped by police | Local govt is responsive | Have some influence over local govt |
|--------------|----------------------------|--------------------------|-------------------------------------|
| Connecticut | 11% | 51% | 67% |
| PUMA 0900105 | 7% | 53% | 69% |
| Monroe | 7% | 56% | 73% |

During the 2020 presidential election, 86 percent of Monroe registered voters cast ballots, compared to 80 percent statewide, and to 87 percent in the 2016 presidential election.

FIGURE 27: REGISTERED VOTER TURNOUT, 2018–2020

ENVIRONMENT & SUSTAINABILITY

Many environmental factors—from access to outdoor resources to tree canopy to exposure to pollutants—can have direct impacts on residents’ health and quality of life. Environmental justice is the idea that these factors of built and natural environments follow familiar patterns of socioeconomic disparities and segregation. The federal Environmental Protection Agency (EPA) ranks small areas throughout the US on their risks of exposure to a variety of pollutants and hazards, scaled to account for the historically disparate impact of these hazards on people of color and lower-income people.

FIGURE 28: EPA ENVIRONMENTAL JUSTICE INDEX BY BLOCK GROUP, PUMA 0900105

Lead paint exposure risk

Air cancer risk

Proximity to water discharge

Proximity to treatment facilities

High-quality built environment resources, such as recreational facilities and safe sidewalks, help keep residents active and bring communities together. Walkable neighborhoods may also encourage decreased reliance on cars. Throughout Connecticut, Black and Latino residents are largely concentrated in denser urban areas which tend to offer greater walkability. Of adults in Monroe, 36 percent report having stores, banks, and other locations they need in walking distance, lower than the share of adults statewide.

ABOUT DATAHAVEN

DataHaven is a non-profit organization with a 25-year history of public service to Connecticut. Our mission is to empower people to create thriving communities by collecting and ensuring access to data on well-being, equity, and quality of life. DataHaven is a formal partner of the National Neighborhood Indicators Partnership of the Urban Institute in Washington, D.C.
