ABOUT THIS DOCUMENT

Compiled by DataHaven in March 2026.

This report is designed to inform local-level efforts to improve community well-being and racial equity. This is version 3.0 of the DataHaven equity profile, which DataHaven has published for all 169 towns, all nine regional councils of government (COGs), and several additional regions of Connecticut. Please contact DataHaven with suggestions for version 4.0 of this report.

EXECUTIVE SUMMARY

Throughout most of the measures in this report, there are important differences by race/ethnicity and neighborhood that reflect differences in access to resources and other social needs. Wherever possible, data are presented with racial/ethnic breakdowns, as defined by existing federal data collection standards. However, for smaller groups or more detailed breakdowns, some values may not be available or have less reliable data. In these cases, values are marked as “N/A,” not available.

Federal and statewide approaches to data collection, including small sample sizes, tend to hide disparities within certain population groups. This does not mean that a given population is not impacted by inequitable social conditions. DataHaven and other organizations often collect information on demographic characteristics besides race/ethnicity, and encourage further analysis and advocacy that can lead to more inclusive data reporting.

Please contact DataHaven at info@ctdatahaven.org with questions about additional reporting that may be possible.

- The Eastern DMHAS service area is a region of **434,723 residents**, **25 percent** of whom are people of color. The region’s population has decreased by **2 percent** since 2010.
- Of the region’s **172,931 households**, **69 percent** are homeowner households.
- **Thirty-one percent** of the Eastern DMHAS service area’s households are cost-burdened, meaning they spend at least 30 percent of their total income on housing costs.
- **Eighty-nine percent** of public high school seniors in the class of 2024 in the region’s public school districts graduated within four years.
- Among the region’s adults ages 25 and up, **34 percent** have earned a bachelor’s degree or higher.
- The Eastern DMHAS service area is home to **172,702 jobs**, with the largest share in the Health Care and Social Assistance sector.
- **Fifty-three percent** of adults in the Eastern DMHAS area say they are in excellent or very good health.
- In 2024, **126 people** in the Eastern DMHAS service area died of drug overdoses.
- **Eighty-three percent** of adults in the Eastern DMHAS area are satisfied with their area, and **50 percent** say their local government is responsive to residents’ needs.
- In the most recent municipal election, **35 percent** of registered voters in the Eastern DMHAS service area voted.
- **Forty-two percent** of adults in the Eastern DMHAS area report having stores, banks, and other locations in walking distance of their home, and **60 percent** say there are safe places to bike in their neighborhood.

For the first time, DataHaven is publishing these reports with a supplemental set of tables where we have modeled values from the DataHaven Community Wellbeing Survey. This methodology makes estimates available for smaller towns or where sample sizes would otherwise be too small to be reliable. See [the appendix](#) for details.

INTRODUCTION

The Eastern DMHAS service area is a region made up of 41 towns. For the purposes of this report, the Eastern DMHAS area will be compared to Connecticut as a whole, as well as to Northeastern Connecticut COG (NCCOG) and Southeastern Connecticut COG (SCCOG). In some cases, data may only be available for these COGs, which account for 87 percent of the region’s population, or for New London and Windham Counties (see **Note 1**).

FIGURE 1: STUDY AREA

The Eastern DMHAS service area is made up of the following towns: Ashford, Bozrah, Brooklyn, Canterbury, Chaplin, Colchester, Columbia, Coventry, East Lyme, Eastford, Franklin, Griswold, Groton, Hampton, Killingly, Lebanon, Ledyard, Lisbon, Lyme, Mansfield, Montville, New London, North Stonington, Norwich, Old Lyme, Plainfield, Pomfret, Preston, Putnam, Salem, Scotland, Sprague, Sterling, Stonington, Thompson, Union, Voluntown, Waterford, Willington, Windham, and Woodstock

Northeastern Connecticut COG is made up of the following towns: Ashford, Brooklyn, Canterbury, Chaplin, Eastford, Hampton, Killingly, Plainfield, Pomfret, Putnam, Scotland, Sterling, Thompson, Union, Voluntown, and Woodstock

Southeastern Connecticut COG is made up of the following towns: Bozrah, Colchester, East Lyme, Franklin, Griswold, Groton, Lebanon, Ledyard, Lisbon, Montville, New London, North Stonington, Norwich, Preston, Salem, Sprague, Stonington, Waterford, and Windham

TABLE 1: ABOUT THE AREA

	Connecticut	Eastern DMHAS
Total population	3,605,944	434,723
Total households	1,420,170	172,931
Homeownership rate	66%	69%
Housing cost burden rate	35%	31%
Adults without a high school diploma	9%	7%
Median household income	\$93,760	N/A
Poverty rate	10%	10%
Adults 19–64 w/o health insurance	7%	6%

DEMOGRAPHICS

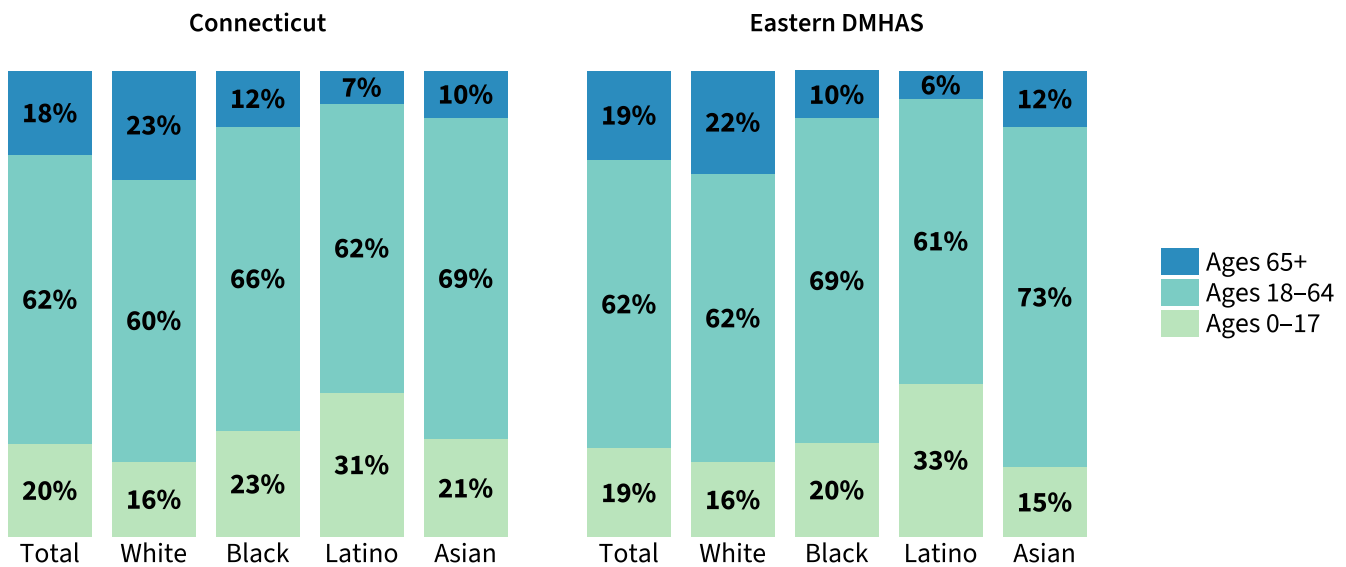

As of 2023, the population of the Eastern DMHAS service area is 430,406, including 80,350 children and 350,056 adults. Twenty-four percent of the Eastern DMHAS area’s residents are people of color, compared to 37 percent of residents statewide.

TABLE 2: POPULATION BY RACE/ETHNICITY, 2023

	White		Black		Latino		Asian		Other race/ethnicity	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	2,265,780	63%	355,413	10%	640,668	18%	169,312	5%	167,175	5%
Eastern DMHAS	327,832	76%	16,867	4%	48,789	11%	15,458	4%	21,460	5%
Northeastern Connecticut COG	83,553	87%	1,611	2%	4,839	5%	1,304	1%	4,522	5%
Southeastern Connecticut COG	199,002	71%	13,847	5%	40,941	15%	10,292	4%	14,943	5%

As Connecticut’s predominantly white Baby Boomers age, younger generations are driving the state’s increased racial and ethnic diversity. Black and Latino populations in particular skew much younger than white populations.

FIGURE 2: POPULATION BY RACE/ETHNICITY AND AGE GROUP, 2023

Note: Only groups with at least 50 residents in each age group shown.

About 33,962 residents of the Eastern DMHAS service area, or 8 percent of the population, are foreign-born (see [Note 2](#)). The largest number of immigrants living in the Eastern DMHAS area were born in China, followed by the Dominican Republic and the Philippines (see [Note 3](#)).

Limited English proficiency is characterized as speaking English less than “very well.” People who struggle with English proficiency may have difficulty in school, seeking health care, accessing social services, or finding work in a largely English-speaking community. As of 2023, 19,233 Eastern DMHAS area residents, or 5 percent of the population ages 5 and older, had limited English proficiency. Latinos and Asian Americans are more likely to have limited English proficiency than other racial/ethnic groups.

When no one in a household ages 5 and above is proficient in English, the members of that household are considered linguistically isolated. Five percent of all Connecticut residents ages 5 and older are linguistically isolated, including 16 percent of Latino residents and 13 percent of Asian residents (see [Note 4](#)).

FIGURE 3: SHARE OF POPULATION SPEAKING ENGLISH LESS THAN VERY WELL BY RACE/ETHNICITY, 2023

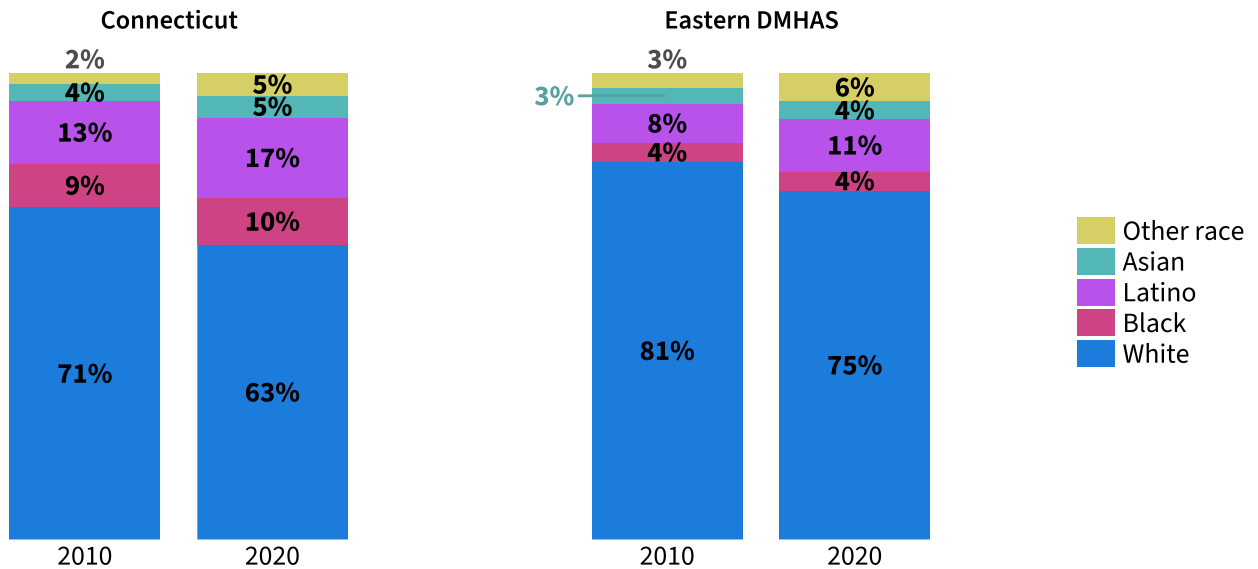

POPULATION CHANGE, 2010–2020

Between 2010 and 2020, Connecticut’s population was nearly stagnant. During this period, Eastern DMHAS shrank by 9,118 people, a 2.1 percent decrease. The number of white residents in the Eastern DMHAS service area shrank by 9.6 percent, while the non-white population grew by 30 percent.

TABLE 3: POPULATION AND POPULATION CHANGE BY AGE GROUP, 2010–2020

		Population, 2010	Population, 2020	Change	Percent change
Connecticut	All ages	3,574,097	3,605,944	+31,847	+0.9%
	Children (0–17)	817,015	736,717	–80,298	–9.8%
	Adults (18+)	2,757,082	2,869,227	+112,145	+4.1%
Eastern DMHAS	All ages	443,841	434,723	–9,118	–2.1%
	Children (0–17)	93,949	81,517	–12,432	–13.2%
	Adults (18+)	349,892	353,206	+3,314	+0.9%

FIGURE 4: SHARE OF POPULATION BY RACE/ETHNICITY, 2010–2020

HOUSING

The Eastern DMHAS service area has 172,931 households, of which 69 percent are homeowner households. Of the region's 189,331 housing units, both occupied and vacant, 71 percent are in single-family buildings and 27 percent are in multifamily buildings. Statewide, 65 percent of all housing units are single-family and 34 percent are multifamily (see [Note 5](#)).

Home values have increased steeply since the start of the COVID-19 pandemic. The typical home value in Connecticut went from \$313,654 in December 2019 to \$413,459 in December 2025, adjusted for inflation. This is a 32% increase, and has made homeownership unattainable for many as wages have not nearly kept up (see [Note 6](#)).

Homeownership rates vary by race/ethnicity. Purchasing a home is more attainable for advantaged groups because the process of purchasing a home has a long history of racially discriminatory practices that continue to restrict access to homeownership today. This challenge, coupled with municipal zoning dominated by single-family housing, results in de facto racial and economic segregation seen throughout Connecticut (see [Note 7](#)).

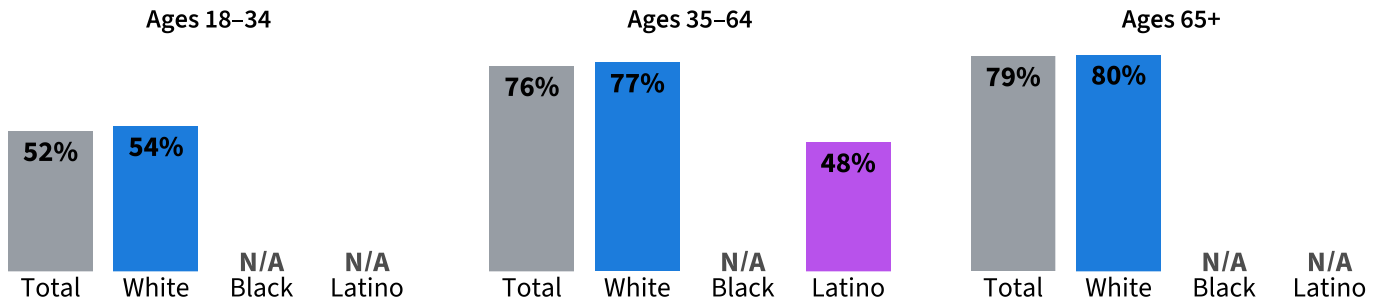

TABLE 4: HOMEOWNERSHIP RATE BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2023

	Total	White	Black	Latino	Asian	Other race
Connecticut	66%	76%	41%	39%	64%	44%
Eastern DMHAS	69%	74%	42%	37%	64%	46%
Northeastern Connecticut COG	76%	77%	N/A	57%	87%	62%
Southeastern Connecticut COG	65%	72%	42%	34%	64%	41%

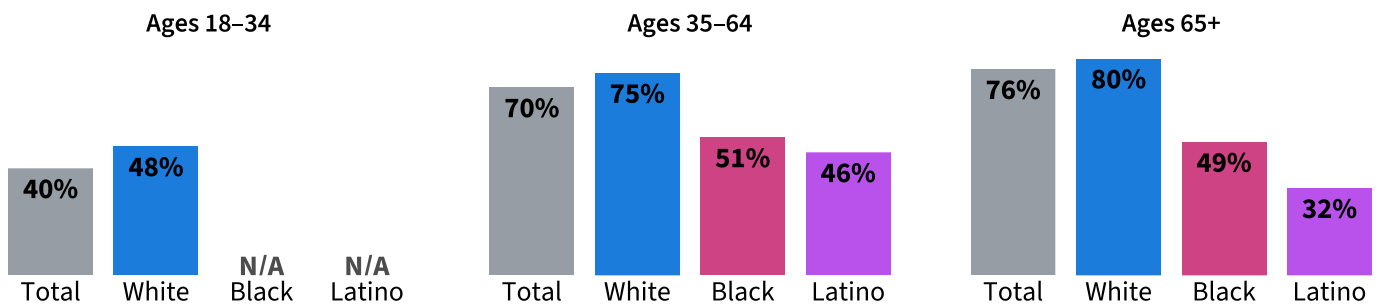

Younger adults are less likely than older adults to own their homes across several race/ethnicity groups. However, in many parts of the state, younger white adults own their homes at rates comparable to or higher than older Black and Latino adults.

FIGURE 5: HOMEOWNERSHIP RATE BY AGE AND RACE/ETHNICITY OF HEAD OF HOUSEHOLD, NORTHEASTERN CONNECTICUT COG AND SOUTHEASTERN CONNECTICUT COG, 2023

Northeastern Connecticut COG

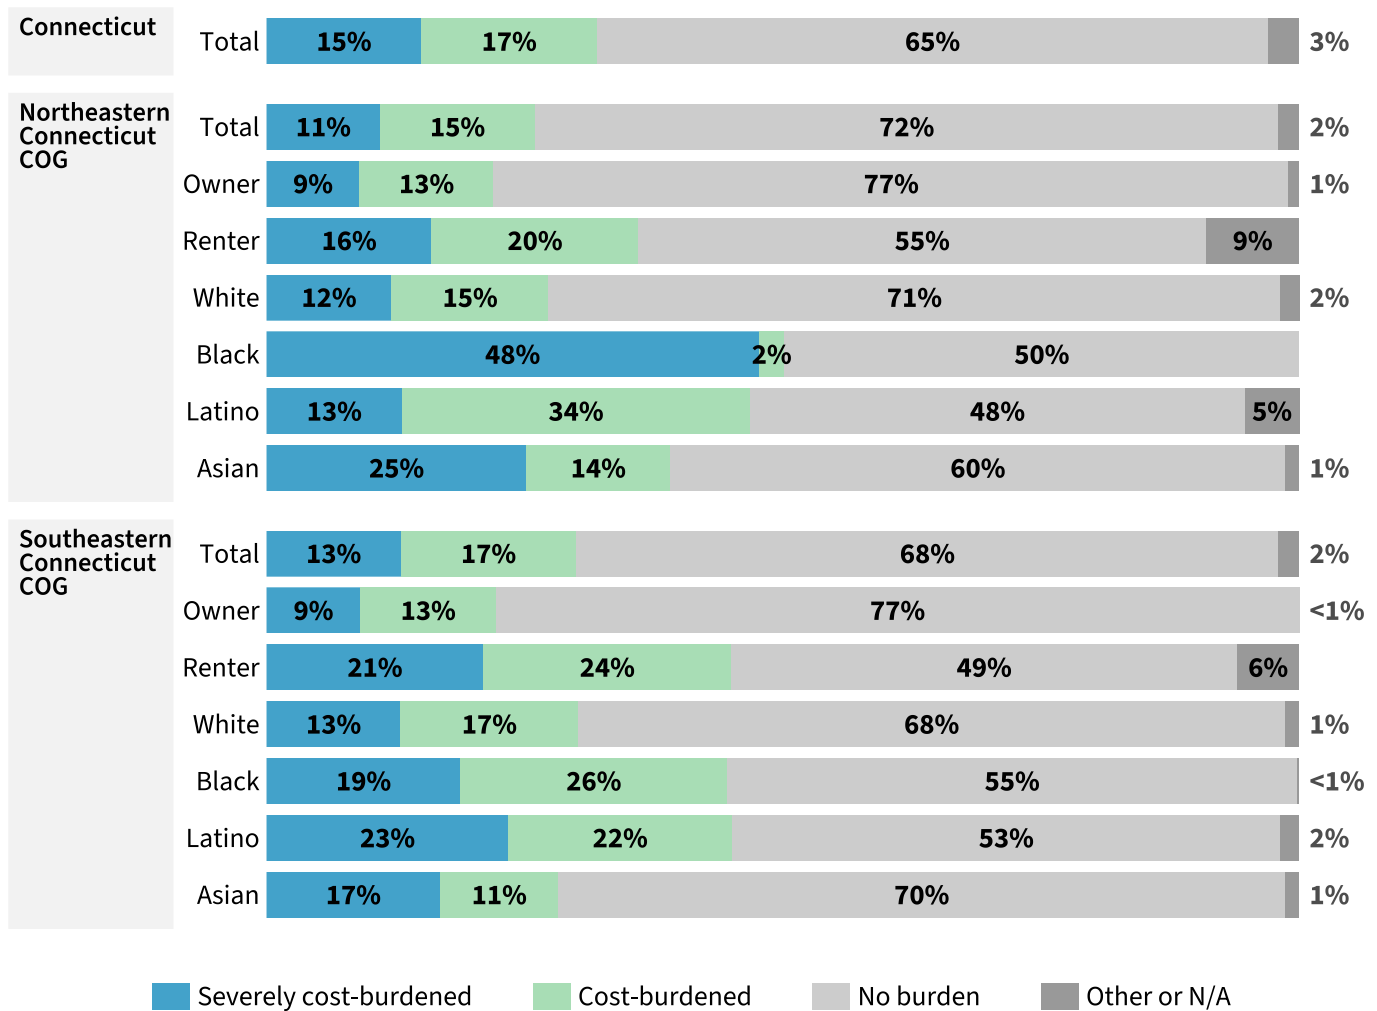

Southeastern Connecticut COG

A household is cost-burdened when they spend 30 percent or more of their income on housing costs, and severely cost-burdened when they spend half or more of their income on housing costs. Housing costs continue to rise, particularly since the early days of the COVID-19 pandemic. Cost-burden generally affects renters more than homeowners, and has greater impact on Black and Latino householders. Among renter households in the Eastern DMHAS area, 44 percent are cost-burdened, compared to 22 percent of owner households.

FIGURE 6: HOUSING COST-BURDEN RATES BY TENURE AND BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2023

Both the state and federal governments have several programs available to help households pay their housing costs, including rental assistance programs like Section 8, mortgage financing, and deed restrictions. Statewide, 11 percent of housing units receive some form of financial assistance; in the Eastern DMHAS area, this is 11 percent as well.

TABLE 5: NUMBER AND SHARE OF ASSISTED HOUSING UNITS BY TOWN, 2023

	Total assisted		Any government assistance		State rental assistance / Section 8		CHFA/USDA mortgages		Deed restricted	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	175,548	11%	94,770	6%	49,611	3%	25,535	2%	5,632	<1%
Eastern DMHAS	20,979	11%	13,986	7%	2,844	1%	3,875	2%	274	<1%
Northeastern Connecticut COG	3,099	7%	1,972	5%	446	1%	677	2%	4	<1%
Southeastern Connecticut COG	16,875	13%	11,464	9%	2,260	2%	2,914	2%	237	<1%

Housing is in short supply across Connecticut, and as a result, very few units of housing are vacant. Units that are available to buy or rent are even more scarce. In 2023, 8 percent of all housing units in the state were vacant, including units that have been sold or rented out but are not yet occupied, as well as seasonal rentals. In the Eastern DMHAS area, 9 percent of all housing units were vacant. Of all units expected to be owner-occupied, less than 1 percent were available for sale.

TABLE 6: TENURE AND VACANCY, 2023

	Total units	Owner units			Rental units		
		Total owner units	Vacant, for sale	Owner vacancy rate	Total rental units	Vacant, for rent	Rental vacancy rate
Connecticut	1,536,049	954,611	8,931	<1%	508,248	23,288	5%
Eastern DMHAS	189,331	120,816	837	<1%	56,979	2,279	4%

Over the past few decades, many parts of the state have shifted away from building single-family housing and toward building more multifamily housing. Between 2020 and 2024, construction permits were issued for 4,390 units of housing in the Eastern DMHAS area, 56 percent of which were for single-family housing (see [Note 8](#)).

Household overcrowding is defined as having more than one occupant per room. Overcrowding may increase the spread of illnesses among the household and can be associated with higher levels of stress. Increasing the availability of appropriately-sized affordable units helps to alleviate overcrowding.

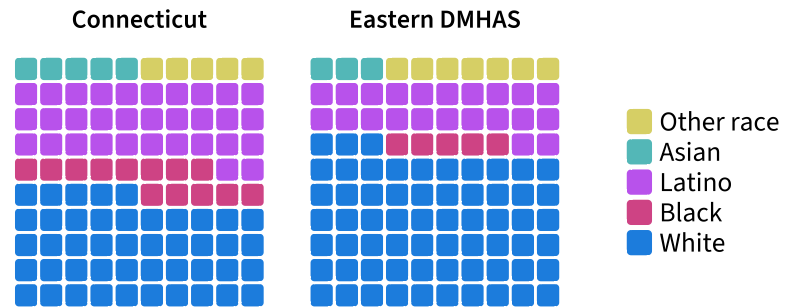

TABLE 7: OVERCROWDED HOUSEHOLDS BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2023

	Total		White		Black		Latino		Asian	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	28,258	2%	7,055	1%	5,060	3%	11,687	6%	3,664	6%

Northeastern Connecticut COG	324	1%	275	1%	N/A	N/A	N/A	N/A	N/A	N/A
Southeastern Connecticut COG	1,195	1%	N/A	N/A	N/A	N/A	600	5%	N/A	N/A

EDUCATION

Public school students in the Eastern DMHAS service area are served by 42 different school districts, including 3 regional districts. During the 2024-25 school year, these districts enrolled a total of 47,760 students. The largest of these is the Groton School District, with 4,009 students enrolled. Tracking student success measures is important since disparate academic and disciplinary outcomes are observed as early as preschool and can ultimately affect a person’s long-term educational attainment and economic potential.

FIGURE 7: PUBLIC K–12 STUDENT ENROLLMENT BY RACE/ETHNICITY PER 100 STUDENTS, 2024-25

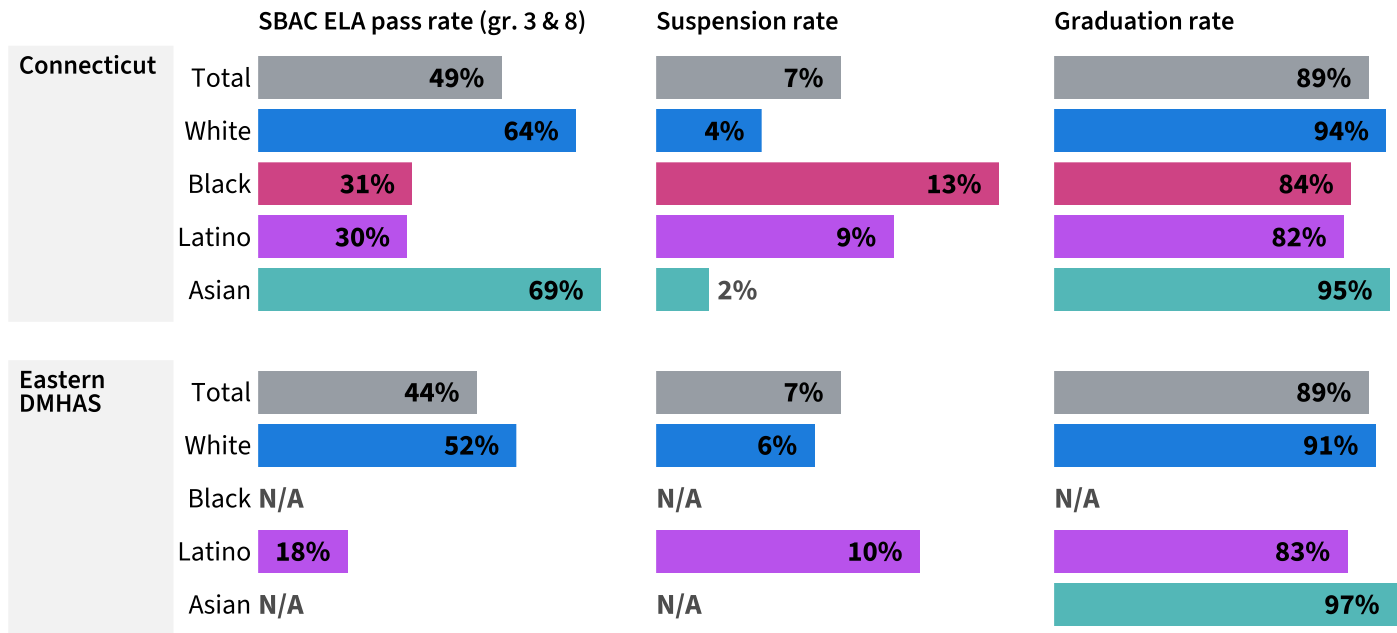

Statewide, nearly half of all public school students qualify for free- or reduced-price meals, and 19 percent are identified as having some form of disability.

TABLE 8: PUBLIC K–12 STUDENT ENROLLMENT BY ENGLISH LANGUAGE LEARNER STATUS, FREE/REDUCED PRICE MEAL ELIGIBILITY, AND SPECIAL EDUCATION DESIGNATION, 2024-25

	Total enrollment	English language learners		Eligible for free/reduced price meals		Students with disabilities	
		Enrolled	Share	Enrolled	Share	Enrolled	Share
Connecticut	508,402	57,533	11%	227,964	45%	94,174	19%
Eastern DMHAS	47,760	3,827	8%	22,209	47%	9,471	20%

FIGURE 8: SELECTED ACADEMIC AND DISCIPLINARY OUTCOMES BY STUDENT RACE/ETHNICITY, 2023-24 AND 2024-25 SCHOOL YEARS

SY 2023-24: Graduation rate
 SY 2024-25: SBAC ELA pass rate, Suspension rate

Adults with high school diplomas or college degrees have more employment options and considerably higher potential earnings, on average, than those who do not finish high school. In the Eastern DMHAS area, 7 percent of adults ages 25 and over, or 21,505 people, lack a high school diploma; statewide, this value is 9 percent.

FIGURE 9: EDUCATIONAL ATTAINMENT BY RACE/ETHNICITY, SHARE OF ADULTS AGES 25 AND UP, 2023

ECONOMY

At the end of 2024, there were 172,702 total jobs in the Eastern DMHAS service area, with the largest share in the Health Care and Social Assistance sector. While many industries saw major job losses early on in the COVID-19 pandemic, by early 2023 the number of jobs statewide had nearly caught back up to pre-pandemic counts.

TABLE 9: JOBS AND WAGES IN EASTERN DMHAS SERVICE AREA'S 5 LARGEST SECTORS, 2024

	Connecticut		Eastern DMHAS	
	Total jobs	Avg annual pay	Total jobs	Avg annual pay
All Sectors	1,661,750	\$88,616	172,702	\$68,956
Health Care and Social Assistance	288,522	\$67,540	26,072	\$61,885
Retail Trade	163,032	\$46,058	18,530	\$40,067
Accommodation and Food Services	123,696	\$31,794	16,273	\$30,267
Manufacturing	154,738	\$101,418	8,668	\$73,622
Professional, Scientific, and Technical Services	99,090	\$140,802	6,426	\$119,860

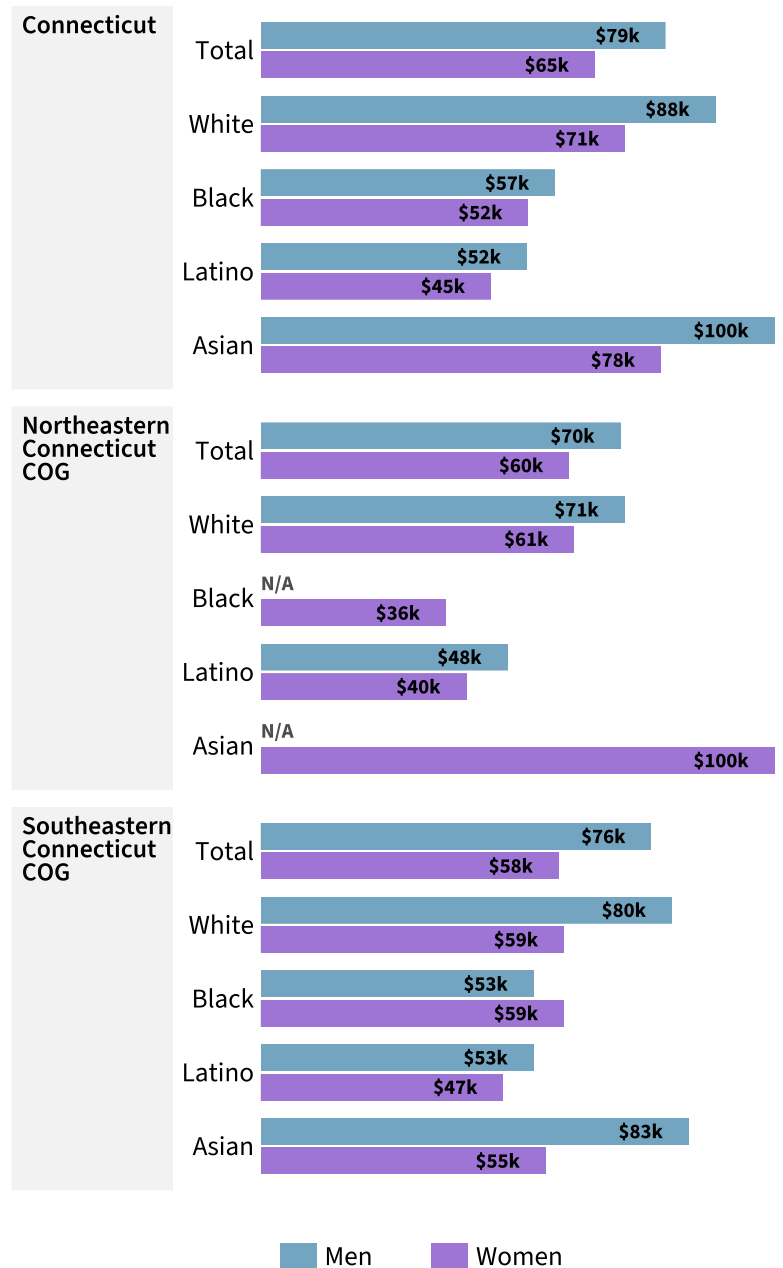

Nationwide, the onset of the pandemic led to a huge spike in unemployment rates, mirrored across Connecticut. At its peak in July 2020, Connecticut’s unemployment rate was 12.1 percent. As of November 2025, unemployment rates for Connecticut, Northeastern Connecticut COG, and Southeastern Connecticut COG were 4.2 percent, 4.4 percent, and 4.2 percent, respectively.

FIGURE 10: MONTHLY UNEMPLOYMENT RATE, 2013–2025, 3-MONTH ROLLING AVERAGE

Individual earnings vary by race/ethnicity, sex, and other characteristics. These can be measured comparing the differences in average earnings between groups. White and Asian workers often out-earn other workers, and within racial groups men often out-earn women. These trends hold even when controlling for educational attainment and within many occupational groups.

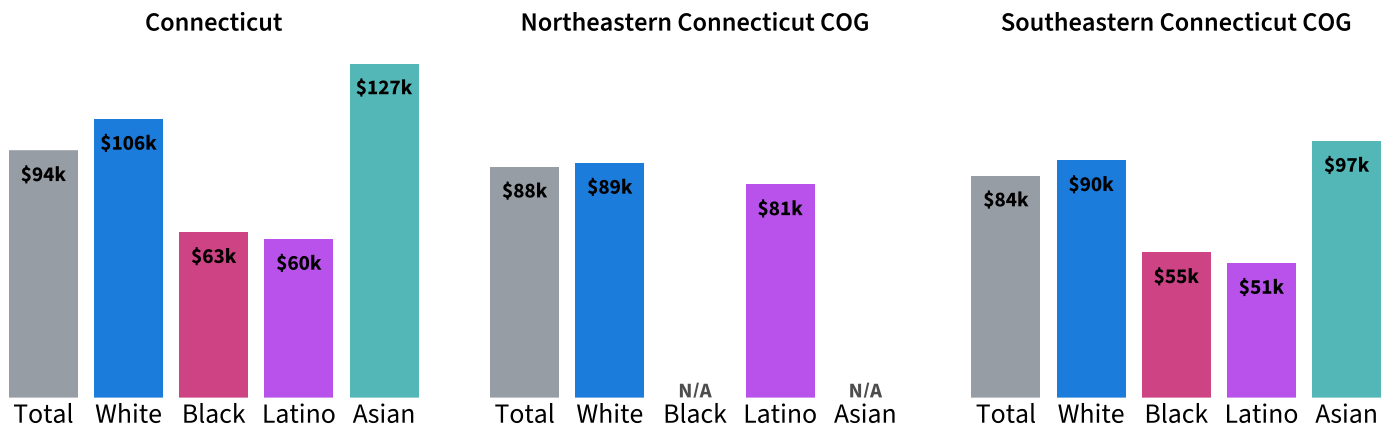

FIGURE 11: MEDIAN INCOME BY RACE/ETHNICITY AND SEX FOR FULL-TIME WORKERS AGES 25 AND OVER WITH POSITIVE INCOME, 2023

INCOME & WEALTH

Town-level median household incomes in the Eastern DMHAS area range from \$55,034 in Windham to \$139,000 in Lyme. Racial disparities in outcomes related to education, housing, employment, and wages result in disparate household-level incomes and overall wealth. Households led by Black or Latino adults generally average lower incomes than white- or Asian-led households.

FIGURE 12: MEDIAN HOUSEHOLD INCOME BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2023

Between the Great Recession and the COVID-19 pandemic, average incomes have not kept pace with inflation over the past two decades. Adjusted for inflation, Connecticut’s median household income in 2023 was \$1,700 lower than in 2000.

TABLE 10: MEDIAN HOUSEHOLD INCOME, WITH LARGEST INCREASE AND DECREASE OF EASTERN DMHAS SERVICE AREA TOWNS, 2000–2023, IN 2023 DOLLARS

	Income, 2000 (2023 dollars)	Income, 2023	Change	Percent change
Connecticut	\$95,460	\$93,760	-\$1,700	-2%
Northeastern Connecticut COG	N/A	\$87,564	N/A	N/A
Southeastern Connecticut COG	N/A	\$84,185	N/A	N/A
Ashford	\$97,345	\$129,219	+\$31,874	+33%
Mansfield	\$86,527	\$67,321	-\$19,206	-22%

With many of the safety measures early in the COVID-19 pandemic, having reliable, high-speed internet at home became a necessity for remote participation in school, expanded job opportunities, and telehealth. Statewide, Black and Latino residents are slightly more likely than average to live in a household without broadband access, though a variety of programs appear to have lessened the digital divide.

TABLE 11: SELECTED ECONOMIC RESOURCE INDICATORS BY RACE/ETHNICITY, 2023

	Total		White		Black		Latino		Asian	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Population living below poverty level

Northeastern Connecticut COG	6,742	7%	6,035	7%	N/A	N/A	N/A	N/A	N/A	N/A
Southeastern Connecticut COG	18,118	7%	13,106	7%	1,161	8%	2,938	8%	N/A	N/A

The Supplemental Nutritional Assistance Program (SNAP, or food stamps) is a program available to very low-income households earning less than 130 percent of the federal poverty guideline (\$30,000 for a family of four in 2023). Throughout the state, poverty and SNAP utilization rates are higher among Black and Latino households than white households. At the time of writing, tens of thousands of households across Connecticut are projected to lose significant amounts of their SNAP benefits under the federal H.R.1, or the “One Big Beautiful Bill Act” (see [Note 9](#)).

Access to a personal vehicle may also be considered a measure of financial security since reliable transportation plays a significant role in job access and quality of life. Vehicle access reduces the time a family may spend running errands or traveling to appointments, school, or work.

TABLE 12: SELECTED HOUSEHOLD ECONOMIC INDICATORS BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2023

	Total		White		Black		Latino		Asian

HEALTH

The socioeconomic disparities described above tend to correlate with health outcomes. Factors such as stable housing, employment, literacy and linguistic fluency, environmental hazards, and transportation all impact access to care, physical and mental health outcomes, and overall quality of life. Income and employment status often drive differences in access to healthcare, the likelihood of getting preventive screenings as recommended, the affordability of life-saving medicines, and the ability to purchase other goods and services, including high-quality housing and nutritious food.

Health-related challenges begin with access to care. Due to differences in workplace benefits, income, and eligibility factors, Black and especially Latino people are less likely to have health insurance than white people. At the time of writing, tens of thousands of people across Connecticut are projected to lose health insurance over the next 10 years under H.R.1. Medicaid recipients are particularly vulnerable to these federal cuts, though exact impacts are still unknown (see **Note 10**).

FIGURE 13: UNINSURED RATE AMONG ADULTS AGES 19–64 BY RACE/ETHNICITY, 2023

Preventive care can help counteract economic disadvantages, as a person’s health can be improved by addressing risk factors like hypertension and chronic stress early. Lack of affordable, accessible, and consistent medical care can lead to residents relying on expensive emergency room visits later on. Overall, 80 percent of the adults in the Eastern DMHAS service area had a checkup in the past year as of 2023, and 70 percent had had a dental visit as of 2022.

FIGURE 14: PREVENTIVE CARE MEASURES, SHARE OF ADULTS BY CENSUS TRACT, EASTERN DMHAS SERVICE AREA

Dental visit in past year, 2022

Annual checkup, 2023

Throughout the state, people of color face greater rates and earlier onset of many chronic diseases and risk factors, particularly those that are linked to socioeconomic status and access to resources. For example, diabetes is much more common among older adults than younger ones, yet middle-aged Black adults in Connecticut have higher diabetes rates than white seniors.

FIGURE 15: SELECTED HEALTH RISK FACTORS, SHARE OF ADULTS, 2015–2024

High blood pressure, 2023

Coronary heart disease, 2023

Current asthma, 2023

Diabetes, 2023

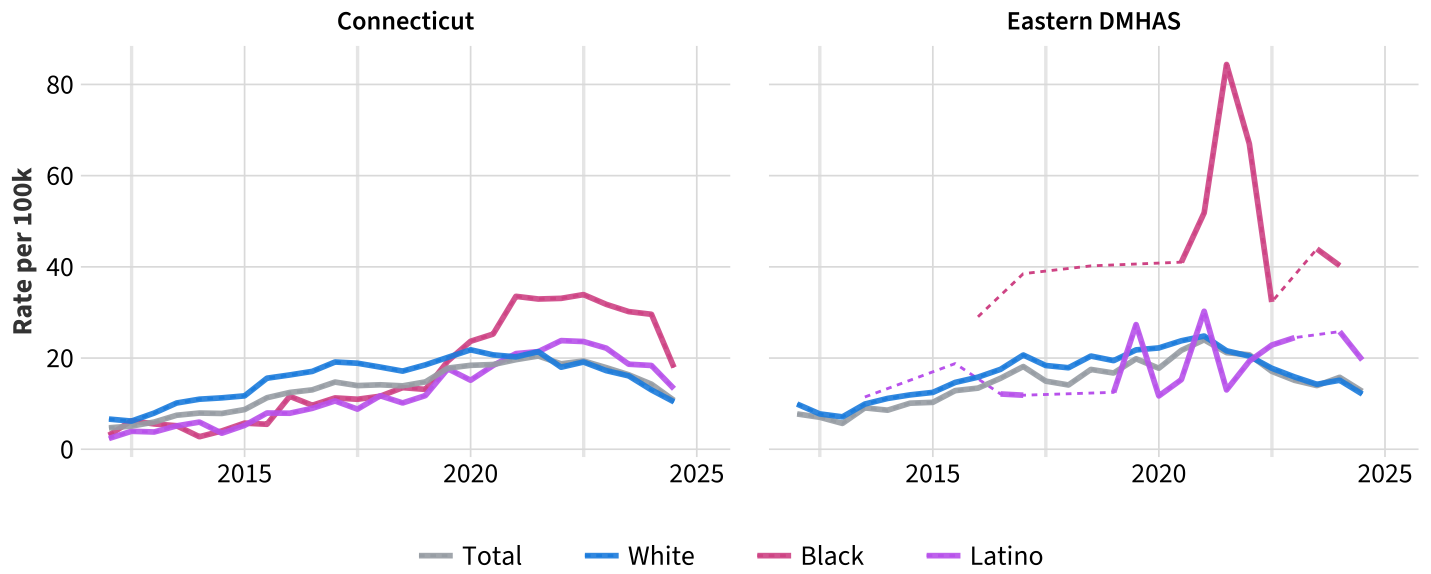

Mental health issues like depression and anxiety can be linked to social determinants like income, employment, and environment, and can pose risks of physical health problems as well, including by complicating a person’s ability to keep up other aspects of their health care. People of color and younger adults are slightly more likely to report feeling mostly or completely anxious and being bothered by feeling depressed or hopeless. Overall, 13 percent of Eastern DMHAS area adults report experiencing anxiety regularly and 12 percent report being bothered by depression.

TABLE 13: SELECTED MENTAL HEALTH INDICATORS, SHARE OF ADULTS, 2015–2024

	Total	By age				By race/ethnicity		
		Ages 18-34	Ages 35-49	Ages 50-64	Ages 65+	White	Black	Latino

Like other states, Connecticut has seen a rise in drug overdose deaths over the last decade. In 2024, Connecticut saw an average of 78 overdose deaths per month, up from 59 in 2015. White residents long comprised the bulk of these deaths, but as overall overdose death rates have increased, an increasing share of those deaths have been people of color. Following a steep rise during the early days of the COVID-19 pandemic, rates have begun to drop recently.

FIGURE 18: AGE-ADJUSTED SEMI-ANNUAL RATES OF DRUG OVERDOSE DEATHS PER 100,000 RESIDENTS BY RACE/ETHNICITY, 2012-2024

Note: Values are suppressed for small populations or few overdose incidents. Dashed lines indicate periods where values are suppressed or otherwise unavailable.

The introduction and spread of fentanyl in drugs—both with and without users’ knowledge—is thought to have contributed to this steep rise in overdoses. In 2016 and 2017, 62 percent of the drug overdose deaths in the Eastern DMHAS area involved fentanyl; in 2024 and 2025, this share was 75 percent.

FIGURE 19: SHARE OF DRUG OVERDOSE DEATHS INVOLVING FENTANYL, AGGREGATED TO TWO-YEAR PERIODS, 2014-2025

As with many other health conditions, Connecticut’s Black and Latino residents face a higher burden of HIV rates. On average each year between 2021 and 2023, Black residents ages 13 and up were about nine times more likely to be diagnosed with HIV than white residents. Men were also much more likely to be diagnosed with HIV than women: men received 11.7 diagnoses per 100,000 male residents ages 13 and up, well above the 3.3 diagnoses per 100,000 women.

Pre-exposure prophylaxis, or PrEP, is a type of medication used to prevent HIV in those at risk of contracting the virus. PrEP has become far more accessible in recent years, in part through the Affordable Care Act. In 2024, Connecticut had 180 people taking PrEP per 100,000 residents ages 13 and up, a large increase from 83 per 100,000 in 2020. Within Northeastern Connecticut COG, 128 people per 100,000 residents took PrEP in 2024; in Southeastern Connecticut COG, this was 131 per 100,000.

FIGURE 20: ANNUALIZED AVERAGE RATE OF NEW HIV DIAGNOSES PER 100,000 RESIDENTS AGES 13 AND OVER, 2021-2023

FIGURE 21: RATE OF PREP USAGE PER 100,000 RESIDENTS AGES 13 AND OVER, 2012-2024

Birth outcomes often reflect health inequities for parents giving birth, and those outcomes can affect a child throughout their life. Often, parents of color have more complications related to birth and pregnancy than white parents. Complications during pregnancy or childbirth also contribute to elevated mortality among parents giving birth.

TABLE 14: SELECTED BIRTH OUTCOMES BY RACE/ETHNICITY OF PARENT GIVING BIRTH, 2020–2024

	Total	White	Black	Latina			Asian
				Latina (overall)	Puerto Rican	Other Latina	
Late or no prenatal care

Children under 7 years old are monitored annually for potential lead poisoning, based on having blood-lead levels in excess of the state’s accepted threshold. This threshold was lowered in 2022 following CDC guidance. Between 2018 and 2020, 6.1 percent of children tested in the Eastern DMHAS service area were found to have elevated blood lead levels, or a concentration of more than 3.5 micrograms of lead per deciliter of blood (see **Note 11**). Children living in homes built before 1960 are at a higher risk of potential lead poisoning due to the more widespread use of lead-based paints in older homes. Statewide, Black and Latino households are more likely to live in structures built before 1960.

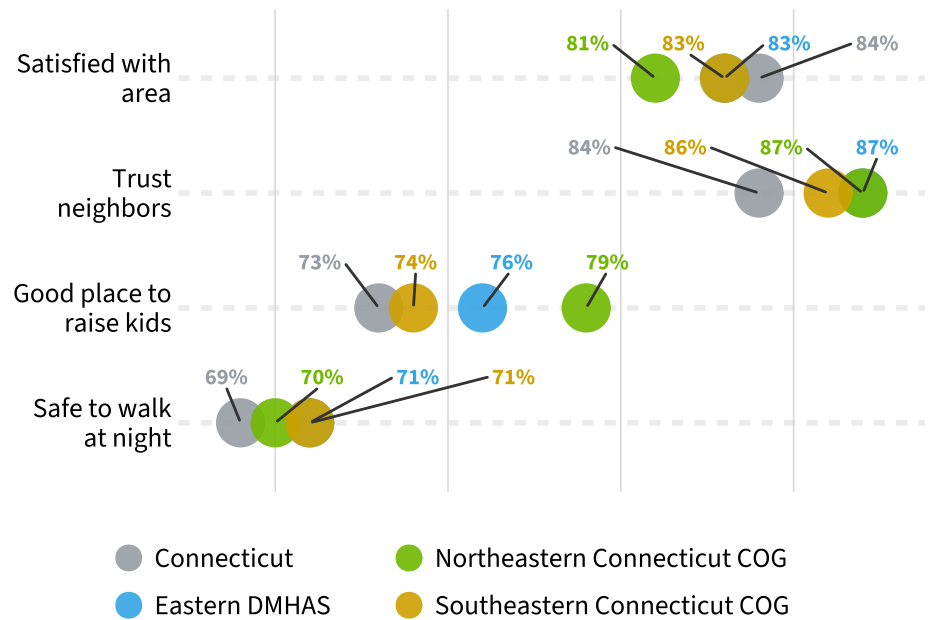

TABLE 15: HOUSEHOLDS LIVING IN STRUCTURES BUILT BEFORE 1960 BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2023

	Total		White		Black		Latino		Asian		Other race	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	572,218	40%	380,423	39%	61,751	45%	97,577	48%	14,572	26%	19,981	41%

CIVIC LIFE & COMMUNITY COHESION

Beyond individual health, several measures from the DataHaven Community Wellbeing Survey show how local adults feel about the health of their neighborhoods. High quality of life and community cohesion can positively impact resident well-being through the availability of resources, sense of safety, and participation in civic life. For example, residents who know and trust their neighbors or feel safe walking at night may find greater social support and access to resources. Overall, 83 percent of adults in the Eastern DMHAS area report being satisfied with the area where they live.

FIGURE 22: RESIDENTS' RATINGS OF COMMUNITY COHESION MEASURES, SHARE OF ADULTS, 2015-2024

Crime rates are based on reports to law enforcement of violent force against persons, as well as offenses involving property. Not all crimes involve residents of the areas where the crimes occur, which is important to consider when evaluating crime rates in areas or towns with more commercial activity. Crime patterns can also vary dramatically by neighborhood. Crime can impact the social and economic well-being of communities, including through negative health effects.

FIGURE 23: GROUP A CRIME RATES PER 100,000 RESIDENTS BY TOWN / JURISDICTION, 2025

A lack of trust in and engagement with local government and experiences of unfair treatment by authorities can impair community well-being and cohesion. Fifty percent of Eastern DMHAS area adults feel their local government is responsive to residents’ needs.

TABLE 16: RESIDENTS’ RATINGS OF LOCAL GOVERNMENT, SHARE OF ADULTS, 2015–2024

	Local govt is responsive	Have some influence over local govt	Unfair treatment by police
Connecticut	52%	66%	16%
Eastern DMHAS	50%	67%	17%
Northeastern Connecticut COG	50%	63%	19%
Southeastern Connecticut COG	47%	66%	18%

Seventy-seven percent of the Eastern DMHAS service area’s eligible voters, or 222,400 people, voted in the 2024 presidential election, and 58 percent (160,462 people) voted in the 2022 state election.

FIGURE 24: REGISTERED VOTER TURNOUT, 2022–2025

ENVIRONMENT & SUSTAINABILITY

Many environmental factors—from access to outdoor resources to tree canopy to exposure to pollutants—can have direct impacts on residents’ health and quality of life. Environmental justice is the idea that these factors of built and natural environments follow familiar patterns of socioeconomic disparities and segregation. Prior to 2025, the federal Environmental Protection Agency (EPA) ranked small areas throughout the US on their risks of exposure to a variety of pollutants and hazards, scaled to account for the historically disparate impact of these hazards on people of color and lower-income people. In 2025, this program was discontinued and the data was removed from EPA websites, though it is still available because of efforts by open data advocates.

FIGURE 25: EPA ENVIRONMENTAL JUSTICE INDEX BY TRACT, EASTERN DMHAS SERVICE AREA, 2024

Heavy traffic exposure

Lead paint exposure

Hazardous waste proximity

Wastewater discharge

High-quality built environment resources, such as recreational facilities and safe sidewalks, help keep residents active and bring communities together. Walkable neighborhoods also encourage decreased reliance on cars, lower emissions, and ease traffic congestion. Throughout Connecticut, Black and Latino residents are largely concentrated in denser urban areas which tend to offer greater walkability. Of adults in the Eastern DMHAS service area, 42 percent report having stores, banks, and other locations they need in walking distance, lower than the share of adults statewide.

FIGURE 26: RESIDENTS' RATINGS OF LOCAL WALKABILITY MEASURES BY LOCATION, SHARE OF ADULTS, 2015-2024

Increasing tree cover has a variety of benefits, including reduced heat at the ground level, reduced runoff into local waterways, and removal of pollutants from the air. An estimated 65 percent of the Eastern DMHAS area’s total area is tree canopy, with another 25 percent being potentially plantable space (see [Note 12](#)).

DATAHAVEN COMMUNITY WELLBEING SURVEY

Throughout the rest of this document, small sample sizes sometimes prevented showing results of the DataHaven Community Wellbeing Survey (DCWS) for smaller towns or subpopulations. A different methodology, however, allows us to model survey results based on both direct measurements and the demographics of every town in the state. Values based on this model are shown in the supplementary tables here. Note that this model may result in slightly different values from those shown elsewhere. Please contact DataHaven for questions on this modeling.

TABLE 18: MODELED ESTIMATES OF THE DATAHAVEN COMMUNITY WELLBEING SURVEY, SHARE OF ADULTS, 2015–2024

A. FINANCIAL SECURITY		
	Connecticut	Eastern DMHAS
On another topic, how well would you say you are managing financially these days? Would you say you are... <i>(Just getting by, Finding it difficult, Finding it very difficult)</i>	36%	36%
Have there been times in the past 12 months when you did not have enough money to buy food that you or your family needed? <i>(Yes)</i>	16%	16%
In the last 12 months, have you not had enough money to provide adequate shelter or housing for you or your family? <i>(Yes)</i>	10%	10%
In the past 12 months, did you stay home when you needed or wanted to go someplace because you had no access to reliable transportation? <i>(Yes)</i>	14%	14%
Do you have access to a car when you need it? Would you say you have access... <i>(Very often or Fairly often)</i>	89%	90%

B. NEIGHBORHOOD ASSETS

	Connecticut	Eastern DMHAS
Many stores, banks, markets or places to go are within easy walking distance of my home. <i>(Strongly agree or Somewhat agree)</i>	57%	43%
There are places to bicycle in or near my neighborhood that are safe from traffic, such as on the street or on special lanes, separate paths or trails. <i>(Strongly agree or Somewhat agree)</i>	65%	61%
My neighborhood has several free or low cost recreation facilities such as parks, playgrounds, public swimming pools, etc. <i>(Strongly agree or Somewhat agree)</i>	72%	64%
I do not feel safe to go on walks in my neighborhood at night. <i>(Strongly disagree or Somewhat disagree)</i>	69%	71%
People in this neighborhood can be trusted. <i>(Strongly agree or Somewhat agree)</i>	84%	87%
How would you describe your ability to influence local-government decision making? Would you say that you have great influence, moderate influence, a little influence, or no influence at all? <i>(Great influence, Moderate influence, or A little influence)</i>	67%	67%

C. PERSONAL WELLBEING

	Connecticut	Eastern DMHAS
The next set of questions are about your health. How would you rate your overall health, would you say your health is excellent, very good, good, fair or poor? <i>(Excellent or Very good)</i>	57%	55%
Overall, how satisfied are you with your life nowadays? <i>(Completely satisfied or Mostly satisfied)</i>	66%	66%
Overall, how happy did you feel yesterday? <i>(Completely or Mostly)</i>	69%	68%
Overall, how anxious did you feel yesterday? <i>(Completely or Mostly)</i>	13%	13%
How often do you get the social and emotional support you need? <i>(Always or Usually)</i>	68%	68%

D. QUALITY OF LIFE

	Connecticut	Eastern DMHAS
Are you satisfied with the city or area where you live? (Yes)	84%	84%
How responsive local government is to the needs of residents (<i>Excellent or Good</i>)	52%	50%
The job done by the police to keep residents safe (<i>Excellent or Good</i>)	75%	75%
The ability of residents to obtain suitable employment (<i>Excellent or Good</i>)	52%	49%
As a place to raise children (<i>Excellent or Good</i>)	73%	76%
The condition of public parks and other public recreational facilities (<i>Excellent or Good</i>)	75%	75%
The availability of affordable, high-quality fruits and vegetables (<i>Excellent or Good</i>)	71%	73%

NOTES

FIGURE AND TABLE NOTES

Front cover. Data shown in the map on the cover are rates of adults having had a checkup in the previous 12 months. See [Figure 14](#).

Table 3. Population and population change by age group, 2010–2020. US Census Bureau 2010 & 2020 Decennial Census.

Figure 4. Share of population by race/ethnicity, 2010–2020. US Census Bureau 2010 & 2020 Decennial Census.

Table 4. Homeownership rate by race/ethnicity of head of household, 2023. DataHaven analysis (2026) of US Census Bureau American Community Survey 2023 5-year estimates.

Figure 5. Homeownership rate by age and race/ethnicity of head of household, Northeastern Connecticut COG and Southeastern Connecticut COG, 2023. DataHaven analysis (2026) of US Census Bureau American Community Survey 2023 5-year public use microdata sample (PUMS) data, accessed via IPUMS. Steven Ruggles, Sarah Flood, Matthew Sobek, Daniel Backman, Grace Cooper, Julia A. Rivera Drew, Stephanie Richards, Renae Rodgers, Jonathan Schroeder, and Kari C.W. Williams. IPUMS USA: Version 16.0 [dataset]. Minneapolis, MN: IPUMS, 2025. <https://doi.org/10.18128/D010.V16.0>

Figure 6. Housing cost-burden rates by tenure and by race/ethnicity of head of household, 2023. DataHaven analysis (2026) of Ruggles, et al. (2025).

Table 5. Number and share of assisted housing units by town, 2023. DataHaven analysis (2026) of Connecticut Department of Housing 2023 Affordable Housing Appeals List. Accessed via <https://data.ct.gov/d/3udy-56vi>

Table 6. Tenure and vacancy, 2023. DataHaven analysis (2026) of US Census Bureau American Community Survey 2023 5-year estimates. Note that except for large cities, town-level estimates are unreliable due to low numbers of vacant units.

Table 7. Overcrowded households by race/ethnicity of head of household, 2023. DataHaven analysis (2026) of US Census Bureau American Community Survey 2023 5-year estimates and Ruggles, et al (2025).

Figure 7. Public K–12 student enrollment by race/ethnicity per 100 students, 2024–25. DataHaven analysis (2026) of enrollment data from the Connecticut State Department of Education, accessed via EdSight at <http://edsight.ct.gov> At the school district level, not all groups may be shown due to CTSDE data suppression rules for small enrollment counts,

even though they may represent more than 1% of the school district population. Note that for the 2024-25 school year, Regional District 06—serving the towns of Goshen, Morris, and Warren—closed, and Regional District 20—serving Goshen, Morris, Warren, and Litchfield—opened. To the best of our ability, all calculations shown here for K-12 data reflect the composition of districts corresponding to the school year reported. This change should only be seen in town- and region-level calculations involving those towns.

Table 8. Public K-12 student enrollment by English language learner status, free/reduced price meal eligibility, and special education designation, 2024-25. DataHaven analysis (2026) of enrollment data from the Connecticut State Department of Education, accessed via EdSight at <http://edsight.ct.gov>. At the school district level, not all groups may be shown due to CTSDE data suppression rules for small enrollment counts, even though they may represent more than 1% of the school district population.

Figure 8. Selected academic and disciplinary outcomes by student race/ethnicity, 2023-24 and 2024-25 school years. DataHaven analysis (2026) of Smarter Balanced Assessment Consortium (SBAC) testing (3rd and 8th grade English/language arts), discipline, and four-year graduation data from the Connecticut State Department of Education, accessed via EdSight. Not all groups' values may be included, or in some cases may be based on estimates, due to CTSDE data suppression rules for small counts. Because students can be suspended more than once in a school year, the suspension rate represents the percentage of students with one or more suspension or expulsion during the school year.

Figure 9. Educational attainment by race/ethnicity, share of adults ages 25 and up, 2023. DataHaven analysis (2026) of US Census Bureau American Community Survey 2023 5-year estimates.

Table 9. Jobs and wages in Eastern DMHAS service area's 5 largest sectors, 2024. DataHaven analysis (2026) of annual employment data from the Connecticut Department of Labor. Note that in some cases, especially for smaller towns or where data were deemed unreliable for whatever reason, data have been suppressed by the department. In a few cases, that may mean large sectors in an area are missing from the analysis here. Available at https://www1.ctdol.state.ct.us/lmi/202/202_annualaverage.asp

Figure 10. Monthly unemployment rate, 2013–2025, 3-month rolling average. DataHaven analysis (2026) of US Bureau of Labor Statistics Local Area Unemployment Statistics. Available at <https://www.bls.gov/lau>

Figure 26. Residents' ratings of local walkability measures by location, share of adults, 2015–2024. DataHaven analysis (2026) of 2015, 2018, 2021, and 2024 DataHaven Community Wellbeing Survey.

Figure 27. Share of land by landcover type. DataHaven analysis (2026) of i-Tree. (2025). OurTrees. I-Tree Tools. Available at <https://ourtrees.itreetools.org>

Table 17. Town-level overview. DataHaven analysis (2026) of US Census Bureau 2020 Decennial Census (as marked); PLACES Project. Centers for Disease Control and Prevention (uninsured); and US Census Bureau American Community Survey 2023 5-year estimates (all others).

Table 18. Modeled estimates of the DataHaven Community Wellbeing Survey, share of adults, 2015–2024. DataHaven analysis (2026) of 2015, 2018, 2021, and 2024 DataHaven Community Wellbeing Survey, modeled using multilevel regression and poststratification (MRP). An interactive version of these tables is available at <https://ctdatahaven.org/data-dashboard> Please contact DataHaven for questions about this methodology.

TEXT NOTES

Note 1. As of 2022, regional councils of governments have replaced counties for most public data about Connecticut, including from the US Census Bureau. Comparison geographies in this report may be different from previous editions. See details from the state about this change here: <https://portal.ct.gov/OPM/IGPP/ORG/Planning-Regions/Planning-Regions---Overview>

Note 2. DataHaven analysis (2026) of US Census Bureau American Community Survey 2023 5-year estimates.

Note 3. DataHaven analysis (2026) of US Census Bureau American Community Survey 2023 5-year estimates.

Note 4. DataHaven analysis (2026) of Ruggles, et al. (2025).

Note 5. DataHaven analysis (2026) of US Census Bureau American Community Survey 2023 5-year estimates.

Note 6. Zillow Research (2026). Zillow Home Value Index. Available at <https://www.zillow.com/research/data> Note that the ZHVI methodology differs from other average measures of home value, in that it is not a median but rather the weighted average of the middle third of home values across the state. In this case, we use the value of all homes, including single-family, condominiums, and cooperative housing.

Note 7. For an in-depth study of the history and impact of redlining in Connecticut, see DataHaven's 2018 report Housing Segregation in Greater New Haven. <https://ctdatahaven.org/reports/ct-data-story-housing-segregation-greater-new-haven>

ACKNOWLEDGEMENTS

This 2025 report builds on work originally supported in 2020 by generous grants from the Emily Hall Tremaine Foundation (tremainefoundation.org). Its current publication was made possible through support from the Hartford Foundation for Public Giving, The Community Foundation for Greater New Haven, The Connecticut Project, and individual donors. The report also benefited from in-kind contributions and guidance from local organizations and residents across Connecticut.

One of the principal data sources used in this report, the DataHaven Community Wellbeing Survey (DCWS), is sustained by more than 80 public and private funders across Connecticut. Lead sponsors of the 2024 and 2025 DCWS included Connecticut Children's, Connecticut Community Foundation, Connecticut Health Foundation, Fairfield County's Community Foundation, Hartford Department of Health and Human Services, Hartford Foundation for Public Giving, Hartford HealthCare, Health Improvement Alliance (Greater Bridgeport), Naugatuck Valley Health District, New Haven Health Department, Nuvance Health, Stamford Health, Stamford Department of Health and Human Services, The Community Foundation for Greater New Haven, The Connecticut Project, Trinity Health of New England, United Way of Central and Northeastern Connecticut, United Way of Connecticut, United Way of Greater New Haven, University of Hartford, Yale Cancer Center, Yale-New Haven Health, and Yale University. The report also relies on statistical information produced by many state and federal agencies. We are grateful for their ongoing commitment to transparent, reliable public data that informs community work across Connecticut.

For additional information, please visit DataHaven (ctdatahaven.org). This report was authored by Camille Seaberry, Kelly Davila, and Mark Abraham of DataHaven.
